STATEMENT OF ADDITIONAL INFORMATION

June 28, 2023

The Stringer Growth Fund (the “Fund”) is a series of 360 Funds, an open-end management investment company registered with the Securities and Exchange Commission as required by the Investment Company Act of 1940, as amended (the “1940 Act”).

This Statement of Additional Information is not a prospectus, and it should be read in conjunction with the Fund’s prospectus dated June 28, 2023, as the same may be amended from time to time. Copies of the Prospectus may be obtained, without charge, by calling the Fund at (877) 244-6235, writing to the Fund at the following address: 4300 Shawnee Mission Parkway, Suite 100, Fairway, KS 66205 or on the Fund’s website at www.stringeramfunds.com.

INVESTMENT OBJECTIVES, POLICIES AND RISKS

360 Funds (the “Trust”) was organized on February 24, 2005 as a Delaware statutory trust. Stringer Growth Fund (the “Fund”) is an open-end management investment company and a separate diversified series of the Trust. The Prospectus describes the Fund’s investment objective and principal investment strategy, as well as the principal investment risks of the Fund.

The Fund’s investment adviser is Stringer Asset Management, LLC (the “Adviser” or “Stringer”).

The following descriptions and policies supplement these descriptions and also include descriptions of certain types of investments that may be made by the Fund but are not principal investment strategies of the Fund.

General Investment Risks. All investments in securities and other financial instruments involve a risk of financial loss. No assurance can be given that the Fund’s investment program will be successful. Investors should carefully review the descriptions of the Fund’s investments and their risks described in the Prospectus and this SAI.

Common Stocks. The Fund may invest in common stocks, which include the common stock of any class or series of domestic or foreign corporations or any similar equity interest, such as a trust or partnership interest. These investments may or may not pay dividends and may or may not carry voting rights. Common stock occupies the most junior position in a company’s capital structure. The Fund may also invest in warrants and rights related to common stocks.

Derivative Instruments. The Fund may (but is not required to) use a variety of derivative instruments (including both long and short positions) in an attempt to enhance the Fund’s investment returns, to hedge against market and other risks in the portfolio, to add leverage to the portfolio and/or to obtain market exposure with reduced transaction costs.

Generally, derivatives are financial contracts whose value depends on, or is derived from, the value of an underlying asset, reference rate or index and may relate to, among other things, stocks, bonds, interest rates, currencies or currency exchange rates, commodities, related indices and other assets. Examples of derivatives and information about some types of derivatives and risks associated therewith follows. The derivatives market is continually evolving and each Fund may invest in derivatives other than those described below.

The value of some derivative instruments in which the Fund may invest may be particularly sensitive to changes in prevailing interest rates, and, like the other investments of the Fund, the ability of the Fund to utilize these instruments successfully may depend in part upon its ability to forecast interest rates and other economic factors correctly. If the Fund incorrectly forecasts such factors and has taken positions in derivative instruments contrary to prevailing market trends, the Fund could suffer losses.

The Fund might not employ any of the strategies described herein, and no assurance can be given that any strategy used will succeed. If the Fund incorrectly forecasts interest rates, market values or other economic factors in utilizing a derivatives strategy, the Fund might have been in a better position if it had not entered into the transaction at all. Also, suitable derivative transactions may not be available in all circumstances. The use of derivative strategies involves certain special risks, including a possible imperfect correlation, or even no correlation, between price movements of derivative instruments and price movements of related investments. While some strategies involving derivative instruments can reduce the

risk of loss, they also can reduce the opportunity for gain or even result in losses by offsetting favorable price movements in related investments or otherwise, due to the possible inability of the Fund to purchase or sell a portfolio security at a time that otherwise would be favorable or the possible need to sell a portfolio security at a disadvantageous time because the Fund is required to maintain asset coverage or offsetting positions in connection with transactions in derivative instruments, and the possible inability of each Fund to close out or to liquidate its derivatives positions. The Fund's use of derivatives may increase or accelerate the amount of ordinary income recognized by shareholders.

Additionally, the regulation of the U.S. and non-U.S. derivatives markets has undergone substantial change in recent years and such change may continue. Effective August 19, 2022 (the "Compliance Date"), Rule 18f-4 under the 1940 Act (the "Derivatives Rule") replaced the asset segregation regime of Investment Company Act Release No. 10666 ("Release 10666") with a new framework for the use of derivatives by registered funds. As of the Compliance Date, the SEC rescinded Release 10666 and withdrew no-action letters and similar guidance addressing a fund's use of derivatives and began requiring funds to satisfy the requirements of the Derivatives Rule. As a result, on or after the Compliance Date, the Funds are no longer required to engage in "segregation" or "coverage" techniques with respect to derivatives transactions and will instead comply with the applicable requirements of the Derivatives Rule.

The Derivatives Rule mandates that a fund adopt and implement: (i) value-at-risk limitations ("VaR"); (ii) a written derivatives risk management program; (iii) new Board oversight responsibilities; and (iv) new reporting and recordkeeping requirements. If a fund's derivative exposure is 10% or less of its net assets, excluding certain currency and interest rate hedging transactions, it can elect to be classified as a limited derivatives user ("Limited Derivatives User") under the Derivatives Rule, in which case a fund is not subject to the full requirements of the Derivatives Rule. Limited Derivatives Users are excepted from VaR testing, implementing a derivatives risk management program, and certain Board oversight and reporting requirements mandated by the Derivatives Rule. However, a Limited Derivatives User is still required to implement written compliance policies and procedures reasonably designed to manage its derivatives risks.

The Derivatives Rule also provides special treatment for reverse repurchase agreements, similar financing transactions and unfunded commitment agreements. Specifically, a fund may elect whether to treat reverse repurchase agreements and similar financing transactions as "derivatives transactions" subject to the requirements of the Derivatives Rule or as senior securities equivalent to bank borrowings for purposes of Section 18 of the 1940 Act. In addition, when-issued or forward settling securities transactions that physically settle within 35-days are deemed not to involve a senior security.

Options on Securities and Indices. As described in the Prospectus, the Fund may, among other things, purchase and sell put and call options on equity, debt or other securities or indices in standardized contracts traded on foreign or domestic securities exchanges, boards of trade, or similar entities, or quoted on the National Association of Securities Dealers Automated Quotations ("NASDAQ") System or on a regulated foreign over-the-counter market, and agreements, sometimes called cash puts, which may accompany the purchase of a new issue from a dealer. Among other reasons, the Fund may purchase put options to protect holdings in an underlying or related security against a decline in market value, and may purchase call options to protect against increases in the prices of securities it intends to purchase pending its ability to invest in such securities in an orderly manner.

An option on a security (or index) is a contract that gives the holder of the option, in return for a premium, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the security underlying the option (or the cash value of the index) at a specified exercise price at any time during the term of the option. The writer of an option on a security has the obligation upon exercise of the option to deliver the underlying security upon payment of the exercise price or to pay the exercise price

upon delivery of the underlying security. Upon exercise, the writer of an option on an index is obligated to pay the difference between the cash value of the index and the exercise price multiplied by the specified multiplier for the index option. (An index is designed to reflect features of a particular financial or securities market, a specific group of financial instruments or securities, or certain economic indicators.)

When the Fund writes a call (put) option on an underlying security it owns (is short), the option is sometimes referred to as a “covered option.” The Fund may write such options. When the Fund writes a call or put option on an underlying security it does not own (is not short), the option is sometimes referred to as a “naked option.”

The Fund may write “naked” call options on individual securities or instruments in which it may invest but that are not currently held by the Fund. When writing “naked” call options, the Fund must deposit and maintain sufficient margin with the broker-dealer through which it wrote the “naked” call option as collateral to ensure that it meets its obligations as the writer of the option. The Fund is further subject to the segregation requirements described below when it writes “naked” call options. Such segregation will ensure that the Fund has assets available to satisfy its obligations with respect to the transaction, but will not limit the Fund’s exposure to loss. During periods of declining securities prices or when prices are stable, writing “naked” call options can be a profitable strategy to increase the Fund’s income with minimal capital risk. However, when the price of the security underlying the written option increases, the Fund is exposed to an increased risk of loss, because if the price of the security underlying the option exceeds the option’s exercise price, the Fund will lose the difference. “Naked” written call options are riskier than covered call options because there is no underlying security held by the Fund that can act as a partial hedge. “Naked” written call options have speculative characteristics, and the potential for loss is theoretically unlimited. When a “naked” written call option is exercised, the Fund must purchase the underlying security to meet its delivery obligation or make a payment equal to the value of its obligation in order to close out the option. There is also a risk, especially with less liquid preferred and debt securities or small capitalization securities, that the securities may not be available for purchase.

A naked put option is a position in which a buyer writes a put option and has no position in the underlying stock. A naked put option may be used when the Fund expects the underlying stock to be trading above the strike price at the time of expiration. The Fund will benefit from a naked put option if the underlying stock is trading above the strike price at the time of the expiration of the put option and expires worthless because the Fund will keep the entire premium. The Fund could lose money if the price of the underlying stock is below the strike price because the put may be exercised against the Fund, causing the fund to buy the stock at the strike price.

If an option written by the Fund expires unexercised, the Fund realizes a capital gain equal to the premium received at the time the option was written. If an option purchased by the Fund expires unexercised, the Fund realizes a capital loss equal to the premium paid. Prior to the earlier of exercise or expiration, an option may be closed out by an offsetting purchase or sale of an option of the same series (type, exchange, underlying security or index, exercise price, and expiration). In addition, the Fund may sell put or call options it has previously purchased, which could result in a net gain or loss depending on whether the amount realized on the sale is more or less than the premium and other transaction costs paid on the put or call option that is sold. There can be no assurance, however, that a closing purchase or sale transaction can be effected when the Fund desires.

The Fund will realize a capital gain from a closing purchase transaction if the cost of the closing option is less than the premium received from writing the option, or, if it is more, the Fund will realize a capital loss. If the premium received from a closing sale transaction is more than the premium paid to purchase the option, the Fund will realize a capital gain or, if it is less, the Fund will realize a capital loss.

The principal factors affecting the market value of a put or a call option include supply and demand, interest rates, the current market price of the underlying security or index in relation to the exercise price of the option, the volatility of the underlying security or index, and the time remaining until the expiration date.

While, as mentioned above, the Fund may write naked call or put options, such options will nonetheless be deemed to be “covered” as such term is used in the context of Section 18 of the 1940 Act. In the case of a call option on a security, a call option is covered for these purposes if the Fund segregates assets determined to be liquid by the Adviser in accordance with procedures approved by the Board of Trustees (the “Board”) in an amount equal to the contract value of the position (minus any collateral deposited with a broker-dealer), on a mark-to-market basis. The option is also covered if the Fund owns the security underlying the call or has an absolute and immediate right to acquire that security without additional cash consideration (or, if additional cash consideration is required, cash or other assets determined to be liquid by the Adviser in accordance with procedures approved by the Board of Trustees in such amount are segregated) upon conversion or exchange of other securities held by the Fund. For a call option on an index, the option is covered if the Fund segregates assets determined to be liquid by the Adviser. A call option is also covered if the Fund holds a call on the same index or security as the call written where the exercise price of the call held is (i) equal to or less than the exercise price of the call written, or (ii) greater than the exercise price of the call written, provided the difference is segregated by the Fund in assets determined to be liquid by the Adviser. A put option on a security or an index is “covered” if the Fund segregates assets determined to be liquid by the Adviser in accordance with procedures approved by the Board of Trustees equal to the exercise price. A put option is also covered if the Fund holds a put on the same security or index as the put written where the exercise price of the put held is (i) equal to or greater than the exercise price of the put written, or (ii) less than the exercise price of the put written, provided the difference is segregated by the Fund in assets determined to be liquid by the Adviser.

OTC Options. The Fund may also purchase and write over-the-counter (“OTC”) options. OTC options differ from traded options in that they are two-party contracts, with price and other terms negotiated between buyer and seller, and generally do not have as much market liquidity as exchange-traded options. The Fund may be required to treat as illiquid OTC options purchased and securities being used to cover certain written OTC options, and they will treat the amount by which such formula price exceeds the intrinsic value of the option (i.e., the amount, if any, by which the market price of the underlying security exceeds the exercise price of the option) as an illiquid investment. The Fund may also purchase and write dealer options.

Risks Associated with Options on Securities and Indices. There are several risks associated with transactions in options on securities, including ETFs, and on indices. For example, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve the intended result. A decision as to whether, when and how to use options involves the exercise of skill and judgment, and even a well-conceived transaction may be unsuccessful because of market behavior or unexpected events.

There can be no assurance that a liquid market will exist when the Fund seeks to close out an option position. If the Fund were unable to close out an option that it had purchased on a security or index, it would have to exercise the option in order to realize any profit or the option may expire worthless. If the Fund were unable to close out a call option that it had written on a security held in its portfolio, it would not be able to sell the underlying security unless the option expired without exercise. As the writer of a call option on an individual security held in the Fund’s portfolio, the Fund foregoes, during the option’s life, the opportunity to profit from increases in the market value of the security or index position covering the call option above the sum of the premium and the exercise price of the call but has retained the risk of loss (net of premiums received) should the price of the underlying security or index position decline. Similarly, as

the writer of a call option on a securities index or ETF, the Fund forgoes the opportunity to profit from increases in the index or ETF over the strike price of the option, though it retains the risk of loss (net of premiums received) should the price of the Fund's portfolio securities decline.

The value of call options written by the Fund will be affected by, among other factors, changes in the value of underlying securities (including those comprising an index), changes in the dividend rates of underlying securities (including those comprising an index), changes in interest rates, changes in the actual or perceived volatility of the stock market and underlying securities and the remaining time to an option's expiration. The value of an option also may be adversely affected if the market for the option is reduced or becomes less liquid. The writer of an option generally has no control over the time when it may be required to fulfill its obligation as a writer of the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price.

The hours of trading for options may not conform to the hours during which the securities held by the Fund are traded. To the extent that the options markets close before the markets for the underlying securities, significant price and rate movements can take place in the underlying markets that may not be reflected in the options markets. In addition, the Fund's options transactions will be subject to limitations established by each of the exchanges, boards of trade or other trading facilities on which the options are traded. An exchange, board of trade or other trading facility may order the liquidation of positions found to be in excess of these limits, and it may impose other sanctions that could adversely affect the Fund engaging in options transactions.

If a put or call option purchased by the Fund is not sold when it has remaining value, and if the market price of the underlying security or index remains equal to or greater than the exercise price (in the case of a put), or remains less than or equal to the exercise price (in the case of a call), the Fund will lose its entire investment in the option. Also, where a put or call option on a particular security or index is purchased to hedge against price movements in a related security or index, the price of the put or call option may move more or less than the price of the related security or index. Furthermore, if trading restrictions or suspensions are imposed on the options markets, the Fund may be unable to close out a position. Similarly, if restrictions on exercise were imposed, the Fund might be unable to exercise an option it has purchased. Except to the extent that a call option on an index or ETF written by the Fund is covered by an option on the same index or ETF purchased by the Fund, movements in the index or ETF may result in a loss to the Fund; however, such losses may be mitigated by changes in the value of the Fund's securities during the period the option was outstanding (based, in part, on the extent of correlation (if any) between the performance of the index or ETF and the performance of the Fund's portfolio securities).

Foreign Currency Options. The Fund may buy or sell put and call options on foreign currencies in various circumstances, including, but not limited to, as a hedge against changes in the value of the U.S. dollar (or another currency) in relation to a foreign currency in which the Fund's securities may be denominated or to cross-hedge or in an attempt to increase the total return when the Adviser anticipates that the currency will appreciate or depreciate in value. In addition, the Fund may buy or sell put and call options on foreign currencies either on exchanges or in the over-the-counter market. A put option on a foreign currency gives the purchaser of the option the right to sell a foreign currency at the exercise price until the option expires. A call option on a foreign currency gives the purchaser of the option the right to purchase the currency at the exercise price until the option expires. Currency options traded on U.S. or other exchanges may be subject to position limits, which may limit the ability of the Fund to reduce foreign currency risk using such options.

Option Combinations. The Fund may combine options transactions, which combinations may be in

the form of option spreads or option collars. Put spreads and collars are designed to protect against a decline in value of a security the Fund owns. A collar involves the purchase of a put and the simultaneous writing of a call on the same security at a higher strike price. The put protects the investor from a decline in the price of the security below the put's strike price. The call means that the investor will not benefit from increases in the price of the security beyond the call's strike price. In a put spread, an investor purchases a put and simultaneously writes a put on the same security at a lower strike price. This combination protects the investor against a decline in the price down to the lower strike price. The premium received for writing the call (in the case of a collar) or writing the put (in the case of a put spread) offsets, in whole or in part, the premium paid to purchase the put.

In a call spread, an investor purchases a call and simultaneously sells a call on the same security, with the call sold having a higher strike price than the call purchased. The purchased call is designed to provide exposure to a potential increase in the value of a security an investor owns. The premium received for writing the call offsets, in part, the premium paid to purchase the corresponding call, but it also means that the investor will not benefit from increases in the price of the security beyond the sold call's strike price.

The Fund may write straddles (covered or uncovered) consisting of a combination of a call and a put written on the same underlying security. A straddle will be covered when sufficient assets are deposited to meet the Fund's immediate obligations. The Fund may use the same liquid assets to cover both the call and put options where the exercise price of the call and put are the same, or the exercise price of the call is higher than that of the put. In such cases, the Fund will also segregate liquid assets equivalent to the amount, if any, by which the put is "in the money."

Futures Contracts. A futures contract is a bilateral agreement to buy or sell a security (or deliver a cash settlement price, in the case of a contract relating to an index or otherwise not calling for physical delivery at the end of trading in the contracts) for a set price in the future. Futures contracts are designated by boards of trade that have been designated "contracts markets" by the Commodities Futures Trading Commission ("CFTC"). No purchase price is paid or received when the contract is entered into. Instead, the Fund, upon entering into a futures contract (and to maintain the Fund's open positions in futures contracts), would be required to deposit with its custodian in a segregated account in the name of the futures broker an amount of cash, U.S. government securities, suitable money market instruments, or liquid, high-grade debt securities, known as "initial margin." The margin required for a particular futures contract is set by the exchange on which the contract is traded, and may be significantly modified from time to time by the exchange during the term of the contract. Futures contracts are customarily purchased and sold on margin that may range upward from less than 5% of the value of the contract being traded. By using futures contracts as a risk management technique, given the greater liquidity in the futures market than in the cash market, it may be possible to accomplish certain results more quickly and with lower transaction costs.

If the price of an open futures contract changes (by increase in the case of a sale or by decrease in the case of a purchase) so that the loss on the futures contract reaches a point at which the margin on deposit does not satisfy margin requirements, the broker will require an increase in the margin. However, if the value of a position increases because of favorable price changes in the futures contract so that the margin deposit exceeds the required margin, the broker will pay the excess to the Fund. These subsequent payments, called "variation margin," to and from the futures broker, are made on a daily basis as the price of the underlying assets fluctuate, making the long and short positions in the futures contract more or less valuable, a process known as "marking to the market." The Fund expects to earn interest income on their initial and variation margin deposits.

The Fund will incur brokerage fees when they purchase and sell futures contracts. Positions taken in the futures markets are not normally held until delivery or cash settlement is required, but are instead liquidated through offsetting transactions that may result in a gain or a loss. While futures positions taken

by the Fund will usually be liquidated in this manner, the Fund may instead make or take delivery of underlying securities whenever it appears economically advantageous for the Fund to do so. A clearing organization associated with the exchange on which futures are traded assumes responsibility for closing out transactions and guarantees that as between the clearing members of an exchange, the sale and purchase obligations will be performed with regard to all positions that remain open at the termination of the contract.

Securities Index Futures Contracts. Purchases or sales of securities index futures contracts may be used in an attempt to protect the Fund's current or intended investments from broad fluctuations in securities prices. A securities index futures contract does not require the physical delivery of securities, but merely provides for profits and losses resulting from changes in the market value of the contract to be credited or debited at the close of each trading day to the respective accounts of the parties to the contract. On the contract's expiration date, a final cash settlement occurs and the futures positions are simply closed out. Changes in the market value of a particular index futures contract reflect changes in the specified index of securities on which the future is based.

By establishing an appropriate "short" position in index futures, the Fund may also seek to protect the value of its portfolio against an overall decline in the market for such securities. Alternatively, in anticipation of a generally rising market, the Fund can seek to avoid losing the benefit of apparently low current prices by establishing a "long" position in securities index futures and later liquidating that position as particular securities are acquired. To the extent that these hedging strategies are successful, the Fund will be affected to a lesser degree by adverse overall market price movements than would otherwise be the case.

Options on Futures Contracts. The Fund may purchase exchange-traded call and put options on futures contracts and write exchange-traded call options on futures contracts. These options are traded on exchanges that are licensed and regulated by the CFTC for the purpose of options trading. A call option on a futures contract gives the purchaser the right, in return for the premium paid, to purchase a futures contract (assume a "long" position) at a specified exercise price at any time before the option expires. A put option gives the purchaser the right, in return for the premium paid, to sell a futures contract (assume a "short" position), for a specified exercise price at any time before the option expires.

The Fund may write options on futures contracts that are "covered." The Fund will be considered "covered" with respect to a put option it has written if, so long as it is obligated as writer of the put, the Fund segregates with its custodian cash, U.S. government securities or liquid securities at all times equal to or greater than the aggregate exercise price of the puts it has written (less any related margin deposited with the futures broker). The Fund will be considered "covered" with respect to a call option it has written on a debt security future if, so long as it is obligated as a writer of the call, the Fund owns a security deliverable under the futures contract. The Fund will be considered "covered" with respect to a call option it has written on a securities index future if the Fund owns securities the price changes of which are, in the opinion of the Adviser, expected to replicate substantially the movement of the index upon which the futures contract is based.

Upon the exercise of a call option, the writer of the option is obligated to sell the futures contract (to deliver a "long" position to the option holder) at the option exercise price, which will presumably be lower than the current market price of the contract in the futures market. Upon exercise of a put, the writer of the option is obligated to purchase the futures contract (deliver a "short" position to the option holder) at the option exercise price, which will presumably be higher than the current market price of the contract in the futures market. When the holder of an option exercises it and assumes a long futures position, in the case of a call, or a short futures position, in the case of a put, its gain will be credited to its futures margin account, while the loss suffered by the writer of the option will be debited to its account and must be immediately paid by the writer. However, as with the trading of futures, most participants in the options

markets do not seek to realize their gains or losses by exercise of their option rights. Instead, the holder of an option will usually realize a gain or loss by buying or selling an offsetting option at a market price that will reflect an increase or a decrease from the premium originally paid.

If the Fund writes options on futures contracts, the Fund will receive a premium but will assume a risk of adverse movement in the price of the underlying futures contract comparable to that involved in holding a futures position. If the option is not exercised, the Fund will realize a gain in the amount of the premium, which may partially offset unfavorable changes in the value of securities held in or to be acquired for the Fund. If the option is exercised, the Fund will incur a loss in the option transaction, which will be reduced by the amount of the premium it has received, but that will offset any favorable changes in the value of its portfolio securities or, in the case of a put, lower prices of securities it intends to acquire.

Options on futures contracts can be used by the Fund to hedge substantially the same risks as might be addressed by the direct purchase or sale of the underlying futures contracts. If the Fund purchases an option on a futures contract, it may obtain benefits similar to those that would result if it held the futures position itself. Purchases of options on futures contracts may present less risk in hedging than the purchase and sale of the underlying futures contracts since the potential loss is limited to the amount of the premium plus related transaction costs.

The purchase of put options on futures contracts may be used as a means of hedging the Fund's portfolio against a general decline in market prices. The purchase of a call option on a futures contract may represent a means of hedging the Fund's portfolio against a market advance when the Fund is fully invested.

The writing of a call option on a futures contract constitutes a partial hedge against declining prices of the underlying securities. If the futures price at expiration is below the exercise price, the Fund will retain the full amount of the option premium, which provides a partial hedge against any decline that may have occurred in the value of the Fund's holdings of securities. The writing of a put option on a futures contract is analogous to the purchase of a futures contract in that it hedges against an increase in the price of securities the Fund intends to acquire. However, the hedge is limited to the amount of premium received for writing the put.

Hedging. The Fund may engage in an ongoing hedging strategy. Hedging is a means of transferring risk that an investor does not wish to assume during an uncertain market environment. The Fund may enter into these transactions: (a) to hedge against changes in the market value of portfolio securities and against changes in the market value of securities intended to be purchased, (b) to close out or offset existing positions, (c) to manage the duration of a portfolio's fixed income investments, or (d) to enhance returns.

Hedging activity in the Fund may involve the use of derivatives including, but not limited to, buying or selling (writing) put or call options on stocks, shares of exchange traded funds ("ETFs") or stock indexes, buying ETFs or other investment companies that engage in hedging strategies, entering into stock index futures contracts or buying or selling options on stock index futures contracts or financial futures contracts, such as futures contracts on U.S. Treasury securities and interest related indices, and options on financial futures, or purchasing foreign currency forward contracts or options on foreign currency. The Fund will buy or sell options on stock index futures traded on a national exchange or board of trade and options on securities and on stock indexes traded on national securities exchanges or through private transactions directly with a broker-dealer. The Fund may hedge a portion of its portfolio by selling stock index futures contracts or purchasing puts on these contracts to limit exposure to an actual or anticipated market decline. The Fund may also hedge against fluctuations in currency exchange rates, in connection with its investments in foreign securities by purchasing foreign forward currency exchange contracts and/or options on foreign currency.

A notice on behalf of the Trust has been filed with the National Futures Association claiming an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act, as amended, and the rules of the Commodity Futures Trading Commission promulgated thereunder, with respect to the Trust's operation. Accordingly, the Fund is not subject to registration or regulation as a commodity pool operator.

Foreign Securities. Foreign securities include U.S. dollar-denominated and non-U.S. dollar-denominated securities of foreign issuers. The Fund may invest directly in foreign equity securities traded directly on U.S. exchanges, foreign exchanges, over-the-counter or in the form of American Depositary Receipts. The Fund may also invest in foreign currency-denominated fixed-income securities. Investing in securities issued by companies whose principal business activities are outside the United States may involve significant risks not present in domestic investments. Many of the risks are more pronounced for investments in developing or emerging market countries, or countries whose markets are becoming open, or have only recently opened, to private investment, foreign investment or both.

American Depositary Receipts ("ADRs"). ADRs provide a method whereby the Fund may invest in securities issued by companies whose principal business activities are outside the United States. ADRs are receipts typically issued by a U.S. bank or trust company evidencing ownership of the underlying securities, and may be issued as sponsored or unsponsored programs. In sponsored programs, an issuer has made arrangements to have its securities trade in the form of ADRs. In unsponsored programs, the issuer may not be directly involved in the creation of the program. Although regulatory requirements with respect to sponsored and unsponsored programs are generally similar, in some cases it may be easier to obtain financial information from an issuer that has participated in the creation of a sponsored program. ADRs are subject to many of the risks affecting foreign investments generally, except for those specific to trading securities on foreign exchanges.

Political and Economic Factors. Foreign investments involve risks unique to the local political, economic, and regulatory structures in place, as well as the potential for social instability, military unrest, or diplomatic developments that could prove adverse to the interests of U.S. investors. Individual foreign economies can differ favorably or unfavorably from the U.S. economy in such respects as growth of gross national product, rate of inflation, capital reinvestment, resource self-sufficiency, and balance of payments position. In addition, significant external political and economic risks currently affect some foreign countries. War and terrorism affect many countries. Many countries throughout the world are dependent on a healthy U.S. economy or economies elsewhere around the world (e.g., Europe), and are adversely affected when the U.S. or other world economies weaken or their markets decline.

Government Action. Governments in certain foreign countries continue to participate to a significant degree, through ownership interest or regulation, in their respective economies. Action by these governments could have a significant effect on market prices of securities and payment of dividends. The economies of many foreign countries are heavily dependent upon international trade and are accordingly affected by protective trade barriers and economic conditions of their trading partners. The enactment by these trading partners of protectionist trade legislation could have a significant adverse effect upon the securities markets of such countries.

Foreign Currencies; Currency Fluctuations. The Fund's investments in foreign securities may be denominated in U.S. dollars or foreign currencies. For securities valued in foreign currencies, a change in the value of any such currency against the U.S. dollar will result in a corresponding change in the U.S. dollar value of the Fund's assets denominated in that currency. Such changes will also affect the Fund's income and may affect the income of companies in which the Fund invests. Generally, when a given currency appreciates against the U.S. dollar (the U.S. dollar weakens), the value of the Fund's securities denominated

in that currency will rise. When a given currency depreciates against the U.S. dollar (the U.S. dollar strengthens), the value of the Fund's securities denominated in that currency will decline. Countries with managed currencies that are maintained at artificial levels to the U.S. dollar rather than at levels determined by the market may experience sudden and large adjustments in the currency which, in turn, can have a disruptive and negative effect on foreign investors. Similarly, the Fund may be adversely affected by holding securities in foreign currencies that are not readily convertible into U.S. dollars.

Potential Adverse Changes. With respect to certain foreign countries, especially developing and emerging ones, there is the possibility of adverse changes in investment or exchange control regulations, expropriation or confiscatory taxation, limitations on the removal of funds or other assets, political or social instability, or diplomatic developments which could affect investments by U.S. persons in those countries.

Information and Supervision. There is generally less publicly available information about foreign companies comparable to reports and ratings that are published about companies in the United States. Foreign companies are also generally not subject to uniform accounting, auditing and financial reporting standards, practices, and requirements comparable to those applicable to U.S. companies. It also is often more difficult to keep currently informed of corporate actions that affect the prices of portfolio securities.

Market Characteristics. Foreign securities markets are generally not as developed or efficient as, and may be more volatile and have less volume and liquidity than, those in the United States. Securities may trade at price/earnings multiples higher than comparable U.S. securities and such levels may not be sustainable. Commissions on foreign securities trades are generally higher than commissions on U.S. exchanges, and while there are an increasing number of overseas securities markets that have adopted a system of negotiated rates, a number are still subject to an established schedule of minimum commission rates. There is generally less government supervision and regulation of foreign securities exchanges, brokers, and listed companies than in the U.S. Moreover, settlement practices for transactions in foreign markets may differ from those in U.S. markets. Such differences include delays beyond periods customary in the U.S. and practices, such as delivery of securities prior to receipt of payment, which increase the likelihood of a "failed settlement." Failed settlements can result in losses to the Fund.

Investment and Repatriation Restrictions. Foreign investment in the securities markets of certain foreign countries is restricted or controlled to varying degrees. These restrictions limit and, at times, preclude investment in such countries and increase the cost and expenses of the Fund. Investments by foreign investors are subject to a variety of restrictions in many developing countries. These restrictions may take the form of prior governmental approval, limits on the amount or type of securities held by foreigners, and limits on the types of companies in which foreigners may invest. Additional or different restrictions may be imposed at any time by these or other countries in which the Fund invests. In addition, the repatriation of both investment income and capital from several foreign countries is restricted and controlled under certain regulations, including in some cases the need for certain government consents.

Taxes. The dividends and interest payable on foreign portfolio securities may be subject to foreign withholding taxes, thus reducing the net amount of income available for distribution to the Fund's shareholders. In addition, some governments may impose a tax on purchases by foreign investors of certain securities that trade in their country.

Depository Receipts. The Fund's investments may include securities of foreign issuers in the form of sponsored or unsponsored ADRs, Global Depositary Receipts (GDRs) and European Depositary Receipts (EDRs). ADRs are depository receipts typically issued by a United State bank or trust company which evidence ownership of underlying securities issued by a foreign corporation. EDRs and GDRs are typically issued by foreign banks or trust companies, although they also may be issued by United States banks or trust

companies, and evidence ownership of underlying securities issued by either a foreign or a United States corporation. Generally, depositary receipts in registered form are designed for use in the United States securities market and depositary receipts in bearer form are designed for use in securities markets outside the United States. Depositary receipts may not necessarily be denominated in the same currency as the underlying securities into which they may be converted. Ownership of unsponsored depositary receipts may not entitle the Fund to financial or other reports from the issuer of the underlying security, to which it would be entitled as the owner of sponsored depositary receipts.

Investments in Small-Cap Companies. The Fund may invest a significant portion of its assets in securities of companies with small market capitalizations. Certain small-cap companies may offer greater potential for capital appreciation than larger companies. However, investors should note that this potential for greater capital appreciation is accompanied by a substantial risk of loss and that, by their very nature, investments in small-cap companies tend to be very volatile and speculative. Small-cap companies may have a small share of the market for their products or services, their businesses may be limited to regional markets, or they may provide goods and services for a limited market. For example, they may be developing or marketing new products or services for markets that are not yet established or may never become established. In addition, small companies may have or will develop only a regional market for products or services and thus be affected by local or regional market conditions. In addition, small-cap companies may lack depth of management or they may be unable to generate funds necessary for growth or potential development, either internally or through external financing on favorable terms. Such companies may also be insignificant in their industries and be subject to or become subject to intense competition from larger companies. Due to these and other factors, the Fund's investments in small-cap companies may suffer significant losses. Further, there is typically a smaller market for the securities of a small-cap company than for securities of a large company. Therefore, investments in small-cap companies may be less liquid and subject to significant price declines that result in losses for the Fund.

Convertible Securities. Although the equity investments of the Fund consist primarily of common and preferred stocks, the Fund may buy securities convertible into common stock if, for example, the Adviser believes that a company's convertible securities are undervalued in the market. Convertible securities eligible for purchase by the Fund include convertible bonds, convertible preferred stocks, and warrants. A warrant is an instrument issued by a corporation that gives the holder the right to subscribe to a specific amount of the corporation's capital stock at a set price for a specified period of time. Warrants do not represent ownership of the underlying securities, but only the right to buy the securities. The prices of warrants do not necessarily move parallel to the prices of underlying securities. Warrants may be considered speculative in that they have no voting rights, pay no dividends, and have no rights with respect to the assets of a corporation issuing them. Warrant positions will not be used to increase the leverage of the Fund; consequently, warrant positions are generally accompanied by cash positions equivalent to the required exercise amount. The Fund's ability to invest in warrants may be limited by the Fund's investment restrictions.

Real Estate Securities. The Fund will not invest in real estate (including mortgage loans and limited partnership interests), but may invest in readily marketable securities issued by companies that invest in real estate or interests therein. The Fund may also invest in readily marketable interests in real estate investment trusts ("REITs"). REITs are generally publicly traded on the national stock exchanges and in the over-the-counter market and have varying degrees of liquidity. Investments in real estate securities are subject to risks inherent in the real estate market, including risk related to changes interest rates.

U.S. Government Securities. The Fund may invest a portion of the portfolio in U.S. government securities, defined to be U.S. government obligations such as U.S. Treasury notes, U.S. Treasury bonds, and U.S. Treasury bills, obligations guaranteed by the U.S. government such as Government National Mortgage

Association (“GNMA”) as well as obligations of U.S. government authorities, agencies and instrumentalities such as Federal National Mortgage Association (“FNMA”), Federal Home Loan Mortgage Corporation (“FHLMC”), Federal Housing Administration (“FHA”), Federal Farm Credit Bank (“FFCB”), Federal Home Loan Bank (“FHLB”), Student Loan Marketing Association (“SLMA”), and The Tennessee Valley Authority. U.S. government securities may be acquired subject to repurchase agreements. While obligations of some U.S. government sponsored entities are supported by the full faith and credit of the U.S. government (e.g. GNMA), several are supported by the right of the issuer to borrow from the U.S. government (e.g. FNMA, FHLMC), and still others are supported only by the credit of the issuer itself (e.g. SLMA, FFCB). No assurance can be given that the U.S. government will provide financial support to U.S. government agencies or instrumentalities in the future, other than as set forth above, since it is not obligated to do so by law. The guarantee of the U.S. government does not extend to the yield or value of the Fund’s shares.

Foreign Government Obligations. The Fund may invest in short-term obligations of foreign sovereign governments or of their agencies, instrumentalities, authorities or political subdivisions. These securities may be denominated in United States dollars or in another currency.

Mortgage-Backed Securities. The Fund may invest in mortgage-backed securities, such as those issued by GNMA, FNMA, FHLMC or certain foreign issuers. Mortgage-backed securities represent direct or indirect participations in, or are secured by and payable from, mortgage loans secured by real property. The mortgages backing these securities include, among other mortgage instruments, conventional 30-year fixed-rate mortgages, 15-year fixed-rate mortgages, graduated payment mortgages and adjustable rate mortgages. The government or the issuing agency typically guarantees the payment of interest and principal of these securities. However, the guarantees do not extend to the securities’ yield or value, which are likely to vary inversely with fluctuations in interest rates, nor do the guarantees extend to the yield or value of the Fund’s shares. These securities generally are “pass-through” instruments, through which the holders receive a share of all interest and principal payments from the mortgages underlying the securities, net of certain fees.

Yields on pass-through securities are typically quoted by investment dealers and vendors based on the maturity of the underlying instruments and the associated average life assumption. The average life of pass-through pools varies with the maturities of the underlying mortgage loans. A pool’s term may be shortened by unscheduled or early payments of principal on the underlying mortgages. The occurrence of mortgage prepayments is affected by various factors, including the level of interest rates, general economic conditions, the location, scheduled maturity and age of the mortgage and other social and demographic conditions. Because prepayment rates of individual pools vary widely, it is not possible to predict accurately the average life of a particular pool. For pools of fixed-rate 30-year mortgages in a stable interest rate environment, a common industry practice in the U.S. has been to assume that prepayments will result in a 12-year average life, although it may vary depending on various factors. At present, pools, particularly those with loans with other maturities or different characteristics, are priced on an assumption of average life determined for each pool. In periods of falling interest rates, the rate of prepayment tends to increase, thereby shortening the actual average life of a pool of mortgage-related securities. Conversely, in periods of rising rates the rate of prepayment tends to decrease, thereby lengthening the actual average life of the pool. However, these effects may not be present, or may differ in degree, if the mortgage loans in the pools have adjustable interest rates or other special payment terms, such as a prepayment charge. Actual prepayment experience may cause the yield of mortgage-backed securities to differ from the assumed average life yield. Reinvestment of prepayments may occur at higher or lower interest rates than the original investment, thus affecting the Fund’s yield.

The rate of interest on mortgage-backed securities is lower than the interest rates paid on the

mortgages included in the underlying pool due to the annual fees paid to the servicer of the mortgage pool for passing through monthly payments to certificate holders and to any guarantor, such as GNMA, and due to any yield retained by the issuer. Actual yield to the holder may vary from the coupon rate, even if adjustable, if the mortgage-backed securities are purchased or traded in the secondary market at a premium or discount. In addition, there is normally some delay between the time the issuer receives mortgage payments from the servicer and the time the issuer makes the payments on the mortgage-backed securities, and this delay reduces the effective yield to the holder of such securities.

Asset-Backed Securities. The Fund may invest in asset-backed securities, which represent participations in, or are secured by and payable from, assets such as motor vehicle installment sales, installment loan contracts, leases of various types of real and personal property and receivables from revolving credit (credit card) agreements. Such assets are securitized through the use of trusts and special purpose corporations. Payments or distributions of principal and interest may be guaranteed up to certain amounts and for a certain time period by a letter of credit or a pool insurance policy issued by a financial institution unaffiliated with the trust or corporation.

Asset-backed securities present certain risks that are not presented by other securities in which the Fund may invest. Automobile receivables generally are secured by automobiles. Most issuers of automobile receivables permit the loan servicers to retain possession of the underlying obligations. If the servicer were to sell these obligations to another party, there is a risk that the purchaser would acquire an interest superior to that of the holders of the asset-backed securities. In addition, because of the large number of vehicles involved in a typical issuance and technical requirements under state laws, the trustee for the holders of the automobile receivables may not have a proper security interest in the underlying automobiles. Therefore, there is the possibility that recoveries on repossessed collateral may not, in some cases, be available to support payments on these securities. Credit card receivables are generally unsecured, and the debtors are entitled to the protection of a number of state and federal consumer credit laws, many of which give such debtors the right to set off certain amounts owed on the credit cards, thereby reducing the balance due. In addition, there is no assurance that the security interest in the collateral can be realized.

Structured Notes, Bonds and Debentures. The Fund may invest in structured notes, bonds and debentures. Typically, the value of the principal and/or interest on these instruments is determined by reference to changes in the value of specific currencies, interest rates, commodities, indexes or other financial indicators (the “Reference”) or the relevant change in two or more References. The interest rate or the principal amount payable upon maturity or redemption may be increased or decreased depending upon changes in the applicable Reference. The terms of the structured securities may provide that in certain circumstances no principal is due at maturity and, therefore, may result in the loss of the Fund’s entire investment. The value of structured securities may move in the same or the opposite direction as the value of the Reference, so that appreciation of the Reference may produce an increase or decrease in the interest rate or value of the security at maturity. In addition, the change in interest rate or the value of the security at maturity may be a multiple of the change in the value of the Reference so that the security may be more or less volatile than the Reference, depending on the multiple. Consequently, structured securities may entail a greater degree of market risk and volatility than other types of debt obligations.

Assignments and Participations. The Fund may invest in assignments of and participations in loans issued by banks and other financial institutions.

When the Fund purchases assignments from lending financial institutions, the Fund will acquire direct rights against the borrower on the loan. However, since assignments are generally arranged through private negotiations between potential assignees and potential assignors, the rights and obligations acquired by the Fund as the purchaser of an assignment may differ from, and be more limited than, those held by the

assigning lender.

Participations in loans will typically result in the Fund having a contractual relationship with the lending financial institution, not the borrower. The Fund would have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender of the payments from the borrower. In connection with purchasing a participation, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and the Fund may not benefit directly from any collateral supporting the loan in which it has purchased a participation. As a result, the Fund purchasing a participation will assume the credit risk of both the borrower and the lender selling the participation. In the event of the insolvency of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower.

The Fund may have difficulty disposing of assignments and participations because there is no liquid market for such securities. The lack of a liquid secondary market will have an adverse impact on the value of such securities and on the Fund's ability to dispose of particular assignments or participations when necessary to meet the Fund's liquidity needs or in response to a specific economic event, such as a deterioration in the creditworthiness of the borrower. The lack of a liquid market for assignments and participations also may make it more difficult for the Fund to assign a value to these securities for purposes of valuing the Fund's portfolio and calculating its net asset value.

The Fund may invest in fixed and floating rate loans ("Loans") arranged through private negotiations between a foreign government (a "Borrower") and one or more financial institutions ("Lenders"). The majority of the Fund's investments in Loans are expected to be in the form of participations in Loans ("Participations") and assignments of portions of Loans from third parties ("Assignments"). Participations typically will result in the Fund having a contractual relationship only with the Lender, not with the Borrower. The Fund will have the right to receive payments of principal, interest and any fees to which it is entitled only from the Lender selling the Participation and only upon receipt by the Lender of the payments from the Borrower. In connection with purchasing Participations, the Fund generally will have no right to enforce compliance by the Borrower with the terms of the loan agreement relating to the Loan, nor any rights of set-off against the Borrower, and the Fund may not directly benefit from any collateral supporting the Loan in which it has purchased the Participation. As a result, the Fund will assume the credit risk of both the Borrower and the Lender that is selling the Participation. In the event of the insolvency of the Lender selling a Participation, the Fund may be treated as a general creditor of the Lender and may not benefit from any set-off between the Lender and the Borrower.

When the Fund purchases Assignments from Lenders, the Fund will acquire direct rights against the Borrower on the Loan. However, since Assignments are generally arranged through private negotiations between potential assignees and potential assignors, the rights and obligations acquired by the Fund as the purchaser of an Assignment may differ from, and be more limited than, those held by the assigning Lender.

There are risks involved in investing in Participations and Assignments. The Fund may have difficulty disposing of them because there is no liquid market for such securities. The lack of a liquid secondary market will have an adverse impact on the value of such securities and on the Fund's ability to dispose of particular Participations or Assignments when necessary to meet the Fund's liquidity needs or in response to a specific economic event, such as a deterioration in the creditworthiness of the Borrower. The lack of a liquid market for Participations and Assignments also may make it more difficult for the Fund to assign a value to these securities for purposes of valuing the Fund's portfolio and calculating its net asset value.

Corporate Debt Securities. The Fund's fixed income investments may include corporate, municipal or other government debt securities. Corporate and municipal debt obligations purchased by the Fund may be any credit quality, maturity or yield. Accordingly, the Fund's debt securities may include "investment grade" securities (those rated at least Baa by Moody's Investors Service, Inc. ("Moody's"), BBB by Standard & Poor's Ratings Services ("S&P") or Fitch Investors Service, Inc. ("Fitch") or, if not rated, of equivalent quality in the Adviser's opinion. In addition, the Fund's debt securities may include lower-rated debt securities including, without limitation, junk bonds. Debt obligations rated Baa by Moody's or BBB by S&P, or Fitch may be considered speculative and are subject to risks of non-payment of interest and principal. Debt obligations rated lower than Baa by Moody's or lower than BBB by S&P or Fitch are generally considered speculative and subject to significant risks of non-payment of interest and principal. Descriptions of the quality ratings of Moody's, S&P and Fitch are contained in this SAI. While the Adviser utilizes the ratings of various credit rating services as one factor in establishing creditworthiness, it relies primarily upon its own analysis of factors establishing creditworthiness.

Money Market Instruments. The Fund may invest in money market instruments including U.S. government obligations or corporate debt obligations (including those subject to repurchase agreements), provided that they are eligible for purchase by the Fund. Money market instruments also may include Banker's Acceptances and Certificates of Deposit of domestic branches of U.S. banks, Commercial Paper, and Variable Amount Demand Master Notes ("Master Notes"). Banker's Acceptances are time drafts drawn on and "accepted" by a bank. When a bank "accepts" such a time draft, it assumes liability for its payment. When the Fund acquires a Banker's Acceptance, the bank that "accepted" the time draft is liable for payment of interest and principal when due. The Banker's Acceptance carries the full faith and credit of such bank. A Certificate of Deposit ("CD") is an unsecured, interest bearing debt obligation of a bank. Commercial Paper is an unsecured, short-term debt obligation of a bank, corporation, or other borrower. Maturities of Commercial Paper generally range from 2 to 270 days and are usually sold on a discounted basis rather than as an interest-bearing instrument. The Fund will invest in Commercial Paper only if it is rated in one of the top two rating categories by Moody's, S&P or Fitch, or if not rated, of equivalent quality in the Adviser's opinion. Commercial Paper may include Master Notes of the same quality. Master Notes are unsecured obligations which are redeemable upon demand of the holder and which permit the investment of fluctuating amounts at varying rates of interest. Master Notes are acquired by the Fund only through the Master Note program of the Fund's custodian bank, acting as administrator thereof. The Adviser will monitor, on a continuous basis, the earnings power, cash flow, and other liquidity ratios of the issuer of a Master Note held by the Fund.

ETFs. The Fund may invest in Exchange Traded Funds ("ETFs"). An ETF is a fund that holds a portfolio of common stocks or bonds designed to track the performance of a securities index or sector of an index. ETFs are traded on a securities exchange based on their market value. An ETF portfolio holds the same stocks or bonds as the index it tracks, so its market price reflects the value of the index at any given time. ETFs are registered investment companies and incur fees and expenses such as operating expenses, licensing fees, registration fees, trustees' fees, and marketing expenses, and ETF shareholders, such as the Fund, pay their proportionate share of these expenses. Your cost of investing in the Fund will generally be higher than the cost of investing directly in ETFs. By investing in the Fund, you will indirectly bear fees and expenses charged by the underlying ETFs in which the Fund invests in addition to the Fund's direct fees and expenses.

Unit Investment Trusts. A unit investment trust, commonly referred to as a UIT, is one of three basic types of investment companies. The other two types are mutual funds and closed-end funds. A unit investment trust is a registered investment company that buys and holds a generally fixed portfolio of stocks, bonds, or other securities. "Units" in the trust are sold to investors (unitholders) who receive a share of principal and dividends (or interest). A UIT has a stated date for termination that varies according to the

investments held in its portfolio. A UIT investing in long-term bonds may remain outstanding for 20 to 30 years. UITs that invest in stocks may seek to capture capital appreciation over a period of a year or a few years. When these trusts are dissolved, proceeds from the securities are either paid to unitholders or reinvested in another trust. A UIT does not actively trade its investment portfolio. That is, a UIT buys a relatively fixed portfolio of securities (for example, five, ten, or twenty specific stocks or bonds), and holds them with little or no change for the life of the UIT. Because the investment portfolio of a UIT generally is fixed, investors know more or less what they are investing in for the duration of their investment. Investors will find the portfolio securities held by the UIT listed in its prospectus.

Repurchase Agreements. The Fund may invest in repurchase agreements. A repurchase agreement is a short term investment in which the purchaser acquires ownership of a U.S. government security and the seller agrees to repurchase the security at a future time at a set price, thereby determining the yield during the purchaser's holding period. Any repurchase transaction in which the Fund engages will require full collateralization of the seller's obligation during the entire term of the repurchase agreement. In the event of a bankruptcy or other default of the seller, the Fund could experience both delays in liquidating the underlying security and losses in value.

Reverse Repurchase Agreements. The Fund may also be involved with reverse repurchase agreements. Reverse repurchase agreements are repurchase agreements in which the Fund is the seller (rather than the buyer) of the securities, and agrees to repurchase them at an agreed upon time and price. A reverse repurchase agreement may be viewed as a type of borrowing by the Fund. Reverse repurchase agreements are subject to credit risks. In addition, reverse repurchase agreements create leverage risks because the Fund must repurchase the underlying security at a higher price, regardless of the market value of the security at the time of repurchase.

Illiquid Investments. The Fund may invest up to 15% of its net assets in illiquid securities, which are investments that cannot be sold or disposed of in the ordinary course of business within seven days at approximately the prices at which they are valued. Under the supervision of the Board of Trustees of the Trust ("Trustees"), the Adviser determines the liquidity of the Fund's investments, and through reports from the Adviser, the Trustees monitor investments in illiquid instruments. In determining the liquidity of the Fund's investments, the Adviser may consider various factors including (1) the frequency of trades and quotations; (2) the number of dealers and prospective purchasers in the marketplace; (3) dealer undertakings to make a market; (4) the nature of the security (including any demand or tender features); and (5) the nature of the marketplace for trades (including the ability to assign or offset the Fund's rights and obligations relating to the investment). If through a change in values, net assets, or other circumstances, the Fund were in a position where more than 15% of its net assets were invested in illiquid securities, the Fund may take appropriate steps to protect the Fund's liquidity as deemed necessary or advisable by the Fund. The Fund, through its Fair Value Committee, values illiquid securities using its fair value procedures (described below) but there can be no assurance that (i) the Fund will determine fair value for a private investment accurately; (ii) that the Fund will be able to sell private securities for the fair value determined by the Fund; or (iii) that the Fund will be able to sell such securities at all. Investment in illiquid securities poses risks of potential delays in resale and uncertainty in valuation. Limitations on resale may have an adverse effect on the marketability of portfolio securities and the Fund may be unable to dispose of illiquid securities promptly or at reasonable prices.

Private Securities Transactions. In general, securities purchased in private transactions are legally restricted as to resale. The Fund's investments in private placements will be subject to a number of risks because the securities will be illiquid securities for which there is no public market. Illiquid securities are subject to risks of potential delays in resale and uncertainty in valuation. In addition, as noted under "Illiquid

Securities” above, if at any time more than 15% of the Fund’s net assets are invested in illiquid securities, the Fund may take appropriate steps to protect the Fund’s liquidity as deemed necessary or advisable by the Fund. In such a case, the Fund may seek to sell private securities in its portfolio prematurely at prices below what the Adviser believes to be the securities’ fair value.

Restricted Securities. Within its limitation on investment in illiquid securities and the Fund’s private investments, the Fund may purchase restricted securities that generally can be sold in privately negotiated transactions, pursuant to an exemption from registration under the federal securities laws, or in a registered public offering. Where registration is required, the Fund may be obligated to pay all or part of the registration expense and a considerable period may elapse between the time it decides to seek registration and the time the Fund may be permitted to sell a security under an effective registration statement. If during such a period adverse market conditions were to develop, the Fund might obtain a less favorable price than prevailed when it decided to seek registration of the security. The Fund values restricted securities under fair value procedures described above under “Illiquid Securities” and as described in the section entitled “Investing in the Fund – Determining the Fund’s Net Asset Value” of the Prospectus.

Forward Commitment & When-Issued Securities. The Fund may purchase securities on a when-issued basis or for settlement at a future date if the Fund holds sufficient assets to meet the purchase price. In such purchase transactions, the Fund will not accrue interest on the purchased security until the actual settlement. Similarly, if a security is sold for a forward date, the Fund will accrue the interest until the settlement of the sale. When-issued security purchases and forward commitments have a higher degree of risk of price movement before settlement due to the extended time period between the execution and settlement of the purchase or sale. As a result, the exposure to the counterparty of the purchase or sale is increased. Although the Fund would generally purchase securities on a forward commitment or when-issued basis with the intention of taking delivery, the Fund may sell such a security prior to the settlement date if the Adviser felt such action was appropriate. In such a case, the Fund could incur a short-term gain or loss.

Short Sales of Securities. The Fund may make short sales, which are transactions in which a Fund sells a security it does not own in anticipation of a decline in the market value of that security. To complete a short sale transaction, the Fund will borrow the security from a broker-dealer, which generally involves the payment of a premium and transaction costs. A Fund then sells the borrowed security to a buyer in the market. The Fund will then cover the short position by buying shares in the market either (i) at its discretion; or (ii) when called by the broker-dealer lender. Until the security is replaced, the Fund is required to pay the broker-dealer lender any dividends or interest that accrue during the period of the loan. In addition, the net proceeds of the short sale will be retained by the broker to the extent necessary to meet regulatory or other requirements, until the short position is closed out.

The Fund will incur a loss as a result of the short sale if the price of the security increases between the date of the short sale and the date on which the Fund replaces the borrowed security. The Fund will realize a gain if the security declines in price between those dates. The amount of any gain will be decreased, and the amount of any loss increased, by the amount of the premium, dividends, interest or expenses the Fund may be required to pay in connection with a short sale. When the Fund makes a short sale, the Fund will segregate liquid assets (such as cash, U.S. government securities, or equity securities) on the Fund’s books and/or in a segregated account at the Fund’s custodian in an amount sufficient to cover the current value of the securities to be replaced as well as any dividends, interest and/or transaction costs due to the broker-dealer lender. In determining the amount to be segregated, any securities that have been sold short by the Fund will be marked to market daily. To the extent the market price of the security sold short increases and more assets are required to meet the Fund’s short sale obligations, additional assets will be segregated to ensure adequate coverage of the Fund’s short position obligations.

In addition, the Fund may make short sales “against the box” i.e., when the Fund sells a security short when the Fund has segregated securities equivalent in kind and amount to the securities sold short (or securities convertible or exchangeable into such securities) and will hold such securities while the short sale is outstanding. The Fund will incur transaction costs, including interest, in connection with opening, maintaining, and closing short sales against the box.

Lending of Portfolio Securities. In order to generate additional income, the Fund may lend portfolio securities in an amount up to 33% of total Fund assets to broker-dealers, major banks, or other recognized domestic institutional borrowers of securities that the Adviser has determined are creditworthy under guidelines established by the Trustees. In determining whether the Fund will lend securities, the Adviser will consider all relevant facts and circumstances. The Fund may not lend securities to any company affiliated with the Adviser. Each loan of securities will be collateralized by cash, securities or letters of credit. The Fund might experience a loss if the borrower defaults on the loan.

The borrower at all times during the loan must maintain with the Fund cash or cash equivalent collateral, or provide to the Fund an irrevocable letter of credit equal in value to at least 100% of the value of the securities loaned. While the loan is outstanding, the borrower will pay the Fund any interest paid on the loaned securities, and the Fund may invest the cash collateral to earn additional income. Alternatively, the Fund may receive an agreed-upon amount of interest income from the borrower who has delivered equivalent collateral or a letter of credit. It is anticipated that the Fund may share with the borrower some of the income received on the collateral for the loan or the Fund will be paid a premium for the loan. Loans are subject to termination at the option of the Fund or the borrower at any time. The Fund may pay reasonable administrative and custodial fees in connection with a loan, and may pay a negotiated portion of the income earned on the cash to the borrower or placing broker. As with other extensions of credit, there are risks of delay in recovery or even loss of rights in the collateral should the borrower fail financially.

INVESTMENT RESTRICTIONS

Fundamental Restrictions. The Fund has adopted the following “fundamental restrictions,” which cannot be changed without approval by holders of a majority of the outstanding voting shares of the Fund. A “majority” for this purpose means the lesser of (i) 67% of the Fund’s outstanding shares represented in person or by proxy at a meeting at which more than 50% of its outstanding shares are represented, or (ii) more than 50% of its outstanding shares.

FUNDAMENTAL RESTRICTIONS. As a matter of fundamental policy, the Fund may not:

- (1) Issue senior securities, except as permitted by Section 18(f)(1) of the 1940 Act;
- (2) Borrow money, except to the extent permitted under Section 18(f)(1) the 1940 Act (including, but not limited to, reverse repurchase agreements and borrowing to meet redemptions). For purposes of this investment restriction, the entry into options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices shall not constitute borrowing;
- (3) Pledge, mortgage or hypothecate its assets, except to the extent necessary to secure permitted borrowings and to the extent related to the deposit of assets in escrow in connection with writing covered put and call options and the purchase of securities on a when-issued or forward commitment basis and collateral and initial or variation margin arrangements with respect to options, forward contracts, futures contracts, including those relating to indices, and options on futures

contracts or indices;

- (4) Act as underwriter except to the extent that, in connection with the disposition of portfolio securities, the Fund may be deemed to be an underwriter under certain federal securities laws;
- (5) Make loans, provided that the Fund may lend its portfolio securities in an amount up to 33% of total Fund assets, and provided further that, for purposes of this restriction, investment in U.S. Government obligations, short-term commercial paper, certificates of deposit, bankers' acceptances and repurchase agreements shall not be deemed to be the making of a loan;
- (6) Purchase or sell real estate or interests in real estate directly; provided, however, that the Fund may purchase and sell securities which are secured by real estate and securities of companies which invest or deal in real estate (including, without limitation, investments in REITs and mortgage-backed securities);
- (7) Purchase or sell commodities, except that the Fund may purchase and sell options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices and may purchase interests in equity securities issued by companies (including, without limitation, investment companies) that hold or invest in one or more commodities as their sole or principal business activity; or
- (8) Invest 25% or more of its total assets in securities of issuers in any particular industry. For purposes of this limitation, securities of the U.S. Government (including its agencies and instrumentalities), securities of state or municipal governments and their political subdivisions and investments in other registered investment companies are not considered to be issued by members of any industry. The Fund will consider the concentration of underlying investments in determining compliance with this policy.

NON-FUNDAMENTAL RESTRICTIONS. The following investment limitations are not fundamental and may be changed without shareholder approval. As a matter of non-fundamental policy, the Fund may not:

- (1) Purchase securities on margin; provided, however, that the Fund may obtain such short-term credits as may be necessary for the clearance of transactions, may make short sales to the extent permitted by the 1940 Act and may enter into options, forward contracts, futures contracts or indices options on futures contracts or indices;
- (2) Make investments for the purpose of exercising control or management over a portfolio company;
- (3) Invest in securities of other registered investment companies, except as permitted under the 1940 Act;
- (4) Invest in interests in oil, gas or other mineral exploration or development programs, although the Fund may invest in the common stock of companies which invest in or sponsor such programs; or
- (5) Purchase warrants if as a result the Fund would then have more than 5% of its total net assets (taken at the lower of cost or current value) invested in warrants.

With respect to the "fundamental" and "non-fundamental" investment restrictions above, if a percentage limitation is adhered to at the time of investment, a later increase or decrease in percentage resulting from any change in value or net assets will not result in a violation of such restriction (i.e., percentage limitations

are determined at the time of purchase); provided, however, that the percentage limitations on borrowing under the Fund's second fundamental investment restriction apply at all times.

PORTFOLIO TRANSACTIONS AND BROKERAGE ALLOCATION

Subject to the general supervision of the Trustees, the Adviser is responsible for, make decisions with respect to, and places orders for all purchases and sales of portfolio securities for the Fund. The Adviser shall manage the Fund's portfolio in accordance with the terms of the Investment Advisory Agreement by and between the Adviser and the Fund (the "Advisory Agreement"). Under the Advisory Agreement, the Adviser selects the securities and manages the investments for the Fund, and also selects broker-dealers to execute portfolio transactions, all subject to the oversight of the Board of Trustees. The Advisory Agreement is described in detail under "Management and Administration". The Adviser serves as investment adviser for a number of client accounts, including the Fund. Investment decisions for the Fund will be made independently from those for any other series of the Trust, if any, and for any other investment companies and accounts advised or managed by the Adviser.

Brokerage Selection. In selecting brokers to be used in portfolio transactions, the Adviser's general guiding principal is to obtain the best overall execution for each trade, which is a combination of price and execution. With respect to execution, the Adviser considers a number of judgmental factors, including, without limitation, the actual handling of the order, the ability of the broker to settle the trade promptly and accurately, the financial standing of the broker, the ability of the broker to position stock to facilitate execution, the Adviser's past experience with similar trades and other factors that may be unique to a particular order. Recognizing the value of these judgmental factors, the Adviser may select brokers who charge a brokerage commission that is higher than the lowest commission that might otherwise be available for any given trade. The Adviser may not give consideration to sales of shares of the Fund as a factor in selecting brokers to execute portfolio transactions. The Adviser may, however, place portfolio transactions with brokers that promote or sell the Fund's shares so long as such transactions are done in accordance with the policies and procedures established by the Trustees that are designed to ensure that the selection is based on the quality of the broker's execution and not on the broker's sales efforts.

Under Section 28(e) of the Securities Exchange Act of 1934, as amended (the "1934 Act"), and as provided in the Advisory Agreement, the Adviser is authorized to cause the Fund to pay a brokerage commission in excess of that which another broker might have charged for effecting the same transaction, in recognition of the value of brokerage and/or research services provided by the broker. The research received may include, without limitation: information on the United States and other world economies; information on specific industries, groups of securities, individual companies, political and other relevant news developments affecting markets and specific securities; technical and quantitative information about markets; analysis of proxy proposals affecting specific companies; accounting and performance systems that allow the Adviser to determine and track investment results; and trading systems that allow the Adviser to interface electronically with brokerage firms, custodians and other providers. Where a product or service has a mixed use among research, brokerage and other purposes, the Adviser will make a reasonable allocation according to the uses and will pay for the non-research and non-brokerage functions in cash using its own funds.

The research and investment information services described above make available to the Adviser for its analysis and consideration the views and information of individuals and research staffs of other securities firms. These services may be useful to the Adviser in connection with advisory clients other than the Fund and not all such services may be useful to the Adviser in connection with the Fund. Although such information may be a useful supplement to the Adviser's own investment information in rendering services to the Fund, the value of such research and services is not expected to reduce materially the expenses of the

Adviser in the performance of its services under the Advisory Agreement and will not reduce the management fees payable to the Adviser by the Fund.

The Fund may invest in securities traded in the over-the-counter market. Transactions in the over-the-counter market are generally principal transactions with dealers and the costs of such transactions involve dealer spreads rather than brokerage commissions. The Fund, where possible, deals directly with the dealers who make a market in the securities involved except in those circumstances where better prices and/or execution are available elsewhere. When a transaction involves exchange listed securities, the Adviser considers the advisability of effecting the transaction with a broker which is not a member of the securities exchange on which the security to be purchased is listed or effecting the transaction in the institutional market.

Aggregated Trades. While investment decisions for the Fund are made independently of the Adviser's other client accounts, the Adviser's other client accounts may invest in the same securities as the Fund. To the extent permitted by law, the Adviser may aggregate the securities to be sold or purchased for the Fund with those to be sold or purchased for other investment companies or accounts in executing transactions. When a purchase or sale of the same security is made at substantially the same time on behalf of the Fund and another investment company or account, the transaction will be averaged as to price and available investments allocated as to amount in a manner which the Adviser believes to be equitable to the Fund and such other investment company or account. In some instances, this investment procedure may adversely affect the price paid or received by the Fund or the size of the position obtained or sold by the Fund.

Portfolio Turnover. The annualized portfolio turnover rate for the Fund is calculated by dividing the lesser of purchases or sales of portfolio securities for the reporting period by the monthly average value of the portfolio securities owned during the reporting period. The calculation excludes all securities whose maturities or expiration dates at the time of acquisition are one year or less. Portfolio turnover of the Fund may vary greatly from year to year as well as within a particular year, and may be affected by cash requirements for redemption of shares and by requirements that enable the Fund to receive favorable tax treatment. Portfolio turnover will not be a limiting factor in making Fund decisions, and the Fund may engage in short-term trading to achieve its investment objectives. The Fund's portfolio turnover rates for the fiscal years ended February 28, 2023, February 28, 2022, and February 28, 2021 were 103%, 105%, and 212%, respectively..

PORTFOLIO HOLDINGS DISCLOSURE

The Board of Trustees of the Trust has adopted policies to govern the circumstances under which disclosure regarding securities held by the Fund and disclosure of purchases and sales of such securities, may be made to shareholders of the Trust or other persons. These policies include the following:

- Public disclosure regarding the securities held by the Fund ("Portfolio Securities") on a given day will not be made until the close of the next business day at least 24 hours after such day.
- Public disclosure regarding the Fund's Portfolio Securities is made periodically through the Fund's Form N-PORT and Semi-Annual and Annual Reports ("Official Reports"). Other than the Official Reports, shareholders and other persons generally may not be provided with information regarding Portfolio Securities held, purchased or sold by the Fund.
- Information regarding Portfolio Securities, and other information regarding the investment activities of the Portfolios, may be disclosed to rating and ranking organizations for use in

connection with their rating or ranking of the Trust or the Fund, but only if such disclosure has been publicly disclosed or approved in writing by the Chief Compliance Officer of the Trust (the “CCO”). The CCO will not approve arrangements prior to public disclosure unless persons receiving the information provide assurances that the information will not be used for inappropriate trading in Fund shares.

- The Trust’s policy relating to disclosure of the Trust’s holdings of Portfolio Securities does not prohibit: (i) disclosure of information to the Trust’s investment adviser or to other Trust service providers, including but not limited to the Trust’s administrator, distributor, custodian, legal counsel and auditors as identified in the Prospectus and this SAI, financial printers such as Quality EDGAR Solutions or to brokers and dealers through which the Trust purchases and sells Portfolio Securities; and (ii) disclosure of holdings of or transactions in Portfolio Securities by the Fund that is made on the same basis to all Fund shareholders. This information is disclosed to third parties under conditions of confidentiality. “Conditions of confidentiality” include (i) confidentiality clauses in written agreements, (ii) confidentiality implied by the nature of the relationship (e.g., attorney-client relationship), (iii) confidentiality required by fiduciary or regulatory principles (e.g., custody relationships), and (iv) understandings or expectations between the parties that the information will be kept confidential.
- The CCO is required to approve any arrangements other than disclosure to service providers under which information relating to Portfolio Securities held by the Portfolios, or purchased or sold by the Fund is disclosed to a shareholder or other person before disclosure in the Official Reports. In making such a determination, the CCO may consider, among other things, the information to be disclosed, the timing of the disclosure, the intended use of the information, whether the arrangement is reasonably necessary to aid in conducting the ongoing business of the Fund, and whether the arrangement will adversely affect the Trust, the Fund or its shareholders. The CCO will not approve such arrangements unless persons receiving the information provide assurances that the information will not be used for inappropriate trading in Fund shares.
- The CCO shall inform the Board of Trustees of any special portfolio holdings disclosure arrangements that are approved by the CCO, and the rationale supporting approval.
- Neither the Trust’s investment adviser nor the Trust (or any affiliated person, employee, officer, trustee or director of the investment adviser or the Trust) may receive any direct or indirect compensation in consideration of the disclosure of information relating to Portfolio Securities held, purchased or sold by the Fund.

DESCRIPTION OF THE TRUST

The Trust, which is a statutory trust organized under Delaware law on February 24, 2005, is an open-end management investment company. The Trust's Declaration of Trust ("Trust Instrument") authorizes the Trustees to divide shares into series, each series relating to a separate portfolio of investments, and to classify and reclassify any unissued shares into one or more classes of shares of each such series. The Fund offers three classes of shares (Class A shares, Class C shares and Institutional Class shares), of which Classes A and C are available for purchase by all investors. Each class represents interests in the same portfolio of investments and has the same rights, but the classes differ with respect to sales loads and ongoing expenses. The number of shares in the Trust shall be unlimited. The Trustees may classify and reclassify the shares of the Fund into additional classes of shares at a future date. When issued for payment as described in the Prospectus and this SAI, shares of the Fund will be fully paid and non-assessable and shall have no preemptive or conversion rights.

In the event of a liquidation or dissolution of the Trust or an individual series, such as the Fund, shareholders of a particular series would be entitled to receive the assets available for distribution belonging to such series. Shareholders of a series are entitled to participate equally in the net distributable assets of the particular series involved in liquidation, based on the number of shares of the series that are held by each shareholder. If there are any assets, income, earnings, proceeds, funds or payments that are not readily identifiable as belonging to any particular series, the Trustees shall allocate them among any one or more of the series as they, in their sole discretion, deem fair and equitable.

Shareholders are entitled to one vote for each full share and a fractional vote for each fractional share held. Shares have non-cumulative voting rights, which means that the holders of more than 50% of the shares voting for the election of Trustees can elect 100% of the Trustees, and in this event, the holders of the remaining shares voting will not be able to elect any Trustees. Rights of shareholders cannot be modified by less than a majority vote.

The Trustees will hold office indefinitely, except that: (1) any Trustee may resign or retire and (2) any Trustee may be removed: (a) any time by written instrument signed by at least two-thirds of the number of Trustees prior to such removal; (b) at any meeting of shareholders of the Trust by a vote of two-thirds of the outstanding shares of the Trust; or (c) by a written declaration signed by shareholders holding not less than two-thirds of the outstanding shares of the Trust. In case a vacancy or an anticipated vacancy on the Board of Trustees shall for any reason exist, the vacancy shall be filled by the affirmative vote of a majority of the remaining Trustees, subject to certain restrictions under the 1940 Act.

The Trust Instrument provides that the Trustees will not be liable in any event in connection with the affairs of the Trust, except as such liability may arise from a Trustee's bad faith, willful misfeasance, gross negligence, or reckless disregard of duties. It also provides that all third parties shall look solely to the Trust property for satisfaction of claims arising in connection with the affairs of the Trust. With the exceptions stated, the Trust Instrument provides that a Trustee or officer is entitled to be indemnified against all liability in connection with the affairs of the Trust.

The Trust will not hold an annual shareholders' meeting unless required by law. There will normally be no annual meeting of shareholders in any year in which the election of Trustees by shareholders is not required by the 1940 Act. As set forth in the Trust's Amended and Restated By-Laws, shareholders of the Trust have the right, under certain conditions, to call a special meeting of shareholders, including a meeting to consider removing a Trustee.

BOARD OF TRUSTEES, OFFICERS, AND PRINCIPAL SHAREHOLDERS

The Trustees are responsible for the management and supervision of the Fund. The Trustees approve all significant agreements between the Trust, on behalf of the Fund, and those companies that furnish services to the Fund; review performance of the Fund; and oversee activities of the Fund. This section of the SAI provides information about the persons who serve as Trustees and Officers to the Trust and Fund, respectively, as well as the entities that provide services to the Fund.

Trustees and Officers. Following are the Trustees and Officers of the Trust, their year of birth, their present position with the Trust or the Fund, and their principal occupation during the past five years. As described above under “Description of the Trust”, each of the Trustees of the Trust will generally hold office indefinitely. The Officers of the Trust will hold office indefinitely, except that: (1) any Officer may resign or retire and (2) any Officer may be removed any time by written instrument signed by at least two-thirds of the number of Trustees prior to such removal. In case a vacancy or an anticipated vacancy on the Board of Trustees shall for any reason exist, the vacancy shall be filled by the affirmative vote of a majority of the remaining Trustees, subject to certain restrictions under the 1940 Act. Those Trustees who are “interested persons” (as defined in the 1940 Act) by virtue of their affiliation with either the Trust or the Adviser, are indicated in the table. The address of each trustee and officer is 4300 Shawnee Mission Parkway, Suite 100, Fairway, KS 66205.

*Mr. Linscott is an Interested Trustee because he is Chief Executive Officer and principal owner of M3Sixty Administration, LLC, the Fund’s administrator and transfer agent.

Board Structure

The Trust’s Board of Trustees includes three independent Trustees and one interested Trustee, Mr. Linscott. Mr. Schmidt, one of the Trust’s independent trustees, serves as the Chairman of the Board. The Trustees have determined that the Trust’s current leadership structure is appropriate, as it allows Trust

management to communicate with each independent Trustee as and when needed, and permits each independent Trustee to be involved in each committee of the Board (each a “Committee”) as well as each Board function. With respect to risk oversight, the Board holds four regular meetings each year to consider and address matters involving the Trust and the Funds. During these meetings, the Board receives reports from the Fund’s administrator, transfer agent and distributor, and Trust management, including the Trust’s President, Mr. Linscott, and the Trust’s Chief Compliance Officer, Richard Yates, on regular quarterly items and, where appropriate and as needed, on specific issues. As part of its oversight function, the Board also may hold special meetings or communicate directly with the Trust’s officers to address matters arising between regular meetings. The Board has established a committee structure that includes an Audit Committee, a Nominating and Corporate Governance Committee and a Proxy Voting Committee (discussed in more detail below). Each of these Committees is comprised entirely of independent Trustees.

Qualification of Trustees

The Board has considered each Trustee's experience, qualifications, attributes and skills in light of the Board’s function and the Trust’s business and structure, and has determined that each Trustee possesses experience, qualifications, attributes and skills that enable the Trustee to be an effective member of the Board. In this regard, the Board has considered the following specific experience, qualifications, attributes and/or skills for each Trustee:

Independent Trustees

Tom M. Wirtshafter	Mr. Wirtshafter has more than 30 years' experience managing and operating a wide range of financial services companies, and is currently a Senior Vice President at American Portfolios Financial Services, a broker-dealer, and American Portfolios Advisors, an investment adviser.
Stephen D. Poppen	Mr. Poppen is currently the Executive Vice President and Chief Financial Officer for the Minnesota Vikings professional football team. In his role, Mr. Poppen is responsible for all financial aspects of the team, including business planning, budgeting, day-to-day financial and administrative operations, human resources, facilities, and U.S. Bank Stadium project financing. Prior to joining the Vikings’ organization, Mr. Poppen was a Certified Public Accountant in the business assurance group of PricewaterhouseCoopers LLP. Mr. Poppen currently is a member of the Twin Cities Habitat for Humanity board of directors and previously held board of director positions with a number of nonprofit organizations.
Thomas J. Schmidt	Mr. Schmidt has more than 30 years’ experience managing and operating financial services companies and is currently Principal of Tom Schmidt & Associates Consulting, LLC. Prior to this, he served as Vice President of the Mutual Fund and Alternative Investment Full Service Transfer Agent at DST Systems, Inc.

Interested Trustee

Randall K. Linscott	Mr. Linscott has over 20 years’ experience with a wide range of financial services companies, including service at PricewaterhouseCoopers, an international public accounting firm, as well as Boston Financial Data Services, a transfer agency, prior to his role at M3Sixty Administration, LLC and with the Trust.
---------------------	--

The Board has determined that each of the Trustees’ careers and background, combined with their interpersonal skills and general understanding of financial and other matters, enable the Trustees to

effectively participate in and contribute to the Board’s functions and oversight of the Trust. References to the qualifications, attributes and skills of Trustees are pursuant to requirements of the Securities and Exchange Commission (the “SEC”), do not constitute holding out the Board or any Trustee as having any special expertise or experience, and shall not impose any greater responsibility on any such person or on the Board by reason thereof.

Trustee Standing Committees. The Trustees have established the following standing committees:

Audit Committee: All of the Independent Trustees are members of the Audit Committee, with Mr. Wirtshafter serving as the Audit Committee Chair and financial expert. The Audit Committee oversees the Fund’s accounting and financial reporting policies and practices, reviews the results of the annual audits of the Fund’s financial statements and interacts with the Fund’s independent auditors on behalf of all the Trustees. The Audit Committee also serves as the Trust’s qualified legal compliance committee. The Audit Committee operates pursuant to an Audit Committee Charter and meets periodically as necessary. The Audit Committee met four times with respect to the Fund in the year ended February 28, 2023.

Nominating and Corporate Governance Committee: All of the Independent Trustees are members of the Nominating and Corporate Governance Committee. The Nominating and Corporate Governance Committee’s purposes, duties and powers are set forth in its written charter included as Appendix B hereto. This charter also describes the process by which shareholders may make nominations. The Nominating and Corporate Governance Committee meets only as necessary and met once during the year ended February 28, 2023.

Proxy Voting Committee: All of the Independent Trustees are members of the Proxy Voting Committee. The Proxy Voting Committee will determine how the Fund should cast its vote, if called upon by the Board or the Adviser, when a matter with respect to which the Fund is entitled to vote presents a conflict between the interests of the Fund’s shareholders, on the one hand, and those of the Fund’s Adviser, principal underwriter or an affiliated person of the Fund, its investment adviser, or principal underwriter, on the other hand. The Proxy Voting Committee will also review the Trust’s Proxy Voting Policy and recommend any changes to the Board as it deems necessary or advisable. The Proxy Voting Committee meets only as necessary and did not meet during the year ended February 28, 2023.

Beneficial Equity Ownership Information. The table below shows for each Trustee the amount of Fund equity securities beneficially owned by each Trustee and the aggregate value of all investments in equity securities of the Fund complex, as of a valuation date of December 31, 2022 and stated as one of the following ranges: A = None; B = \$1-\$10,000; C = 10,001-\$50,000; D - \$50,001-100,000; and E = over \$100,000.

Name of Director*		Dollar Range of Equity Securities in the Fund	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Director in Family of Investment Companies
Independent Trustees			
Tom M. Wirtshafter	Stringer Growth Fund	A	A
Stephen D. Poppen	Stringer Growth Fund	A	A
Thomas J. Schmidt	Stringer Growth Fund	A	A
Interested Trustee			
Randall K. Linscott	Stringer Growth Fund	A	A

As of June 2, 2023, the Trustees and officers of the Trust as a group owned beneficially (*i.e.*, directly or indirectly had voting and/or investment power) less than 1% of the then outstanding shares of the Fund. No person is known by the Trust to be the beneficial owner of more than 5% of the outstanding shares of the Class A of the Fund as of June 2, 2023. The following shareholders owned beneficially or of record more than 5% of the outstanding shares of Class C Shares and Institutional Class Shares of the Fund as of June 2, 2023.

Class C Shares	
Name and Address of Principal Holder	Percentage Owned of Record
RBC Capital Markets Mutual Fund Omnibus Processing 60 South Sixth Street Minneapolis, MN 55402	5.81%

Institutional Class Shares	
Name and Address of Principal Holder	Percentage Owned of Record
Raymond James & Associates Inc. FBO Randall B. Jones & Poppy S. Jones Cedar Park, TX 78613	5.27%

Compensation. Officers of the Trust and Trustees who are “interested persons” of the Trust or the Adviser will receive no salary or fees from the Trust. Officers of the Trust and interested Trustees do receive compensation directly from certain service providers to the Trust, including Matrix 360 Distributors, LLC and M3Sixty Administration LLC. Each Trustee who is not an “interested person” receives a fee of \$5,000 each year, plus a fee of \$1,500 per Fund each year, and \$200 per Fund per Board or committee meeting attended. The Trust reimburses each Trustee and officer for his or her travel and other expenses relating to attendance at such meetings. The table below reflects the amount of compensation received by each Trustee for the fiscal year ended February 28, 2023.

Name of Trustee*	Aggregate Compensation from the Fund*	Pension or Retirement Benefits Accrued As Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation From Fund and Fund Complex Paid to Trustees**
Independent Trustees				
Gary W. DiCenzo***	\$1,767	None	None	\$10,400
Arthur Q. Falk****	\$3,333	None	None	\$21,200
Tom M. Wirtshafter	\$3,333	None	None	\$20,800
Stephen D. Poppen	\$3,333	None	None	\$20,800
Thomas J. Schmidt	\$3,333	None	None	\$21,200
Interested Trustee				
Randall K. Linscott	None	None	None	None

* Figures are for the period ended February 28, 2023.

** Each of the Trustees serves as a Trustee to the 7 series of the Trust.

*** Mr. DiCenzo resigned on September 6, 2022.

**** Mr. Falk retired on January 31, 2023.

MANAGEMENT AND ADMINISTRATION

Investment Adviser. Stringer Asset Management, LLC serves as the investment adviser to the Fund. The Adviser's principal office is located at 5050 Poplar Avenue, Suite 1103, Memphis, TN 38157. Information about the Adviser and its duties and compensation as Adviser is contained in the Fund's Prospectus. The Adviser is a Delaware limited liability company and registered as an investment adviser under the Investment Advisers Act of 1940, as amended.

The Adviser supervises the Fund's investments pursuant to an investment advisory agreement with the Trust (the "Advisory Agreement"). The Advisory Agreement became effective for an initial two-year period and is renewed thereafter only so long as such renewal and continuance is specifically approved at least annually by the Trustees or by vote of a majority of the Fund's outstanding voting securities, provided the continuance is also approved by a majority of the Trustees who are not parties to the Advisory Agreement or interested persons of any such party.

The Adviser manages the operations of the Fund and manages the Fund's investments in accordance with the stated policies of the Fund, subject to the approval of the Trustees.

Under the Advisory Agreement, the Adviser is not liable for any error of judgment or mistake of law or for any loss suffered by the Fund in connection with the performance of such Advisory Agreement, except a loss resulting from a breach of fiduciary duty with respect to the receipt of compensation for services; or a loss resulting from willful misfeasance, bad faith or gross negligence on the part of the Adviser in the performance of its duties; or from its reckless disregard of its duties and obligations under the Advisory Agreement.

Gary Stringer, CFA, is the President and Chief Investment Officer of the Adviser. Stringer Asset Management, LLC is owned by Laurus Principal Group, LLC.

The Adviser will receive a monthly management fee equal to an annual rate of 0.95% of the Fund's net assets. The Adviser has entered into an Expense Limitation Agreement with the Fund under which it has agreed to waive or reduce its fees and to assume other expenses of the Fund, if necessary, in an amount that limits the Fund's annual operating expenses (exclusive of interest, taxes, brokerage fees and commissions, other expenditures that are capitalized in accordance with generally accepted accounting principles, acquired funds fees and expenses, other extraordinary expenses not incurred in the ordinary course of the Fund's business, interest and dividend expense on securities sold short, and amounts, if any, payable pursuant to a plan adopted in accordance with Rule 12b-1 of the Investment Company Act of 1940, as amended) to not more than 1.05% until and through at least June 30, 2024. Subject to approval by the Fund's Board, any waiver under the Expense Limitation Agreement is subject to repayment by the Fund within the three fiscal years following the year in which such waiver occurred, if the Fund is able to make the payment without exceeding the 1.05% expense limitation. The current contractual agreement cannot be terminated prior to at least one year after the effective date without the Board of Trustees' approval.

The table below provides the compensation paid to the Adviser by the Fund and the Waived and Recouped Management Fees made by the Adviser during the fiscal year indicated:

Fiscal Year End	Management Fees Earned	Waived Management Fees	Recouped Management Fees	Net Management Fees
February 28, 2021	\$260,479	\$236,559	\$0	\$23,920
February 28, 2022	\$346,555	\$247,755	\$0	\$98,800

February 28, 2023	\$298,868	\$272,136	\$0	\$26,732
-------------------	-----------	-----------	-----	----------

In addition to the management fees described above, the Adviser may also receive certain benefits from its management of the Fund in the form of brokerage or research services received from brokers under arrangements under Section 28(e) of the 1934 Act and the terms of the Advisory Agreement. For a description of these potential benefits, see the description under “Portfolio Transactions and Brokerage Allocation -- Brokerage Selection.”

The Fund paid the following brokerage fees during the following fiscal year:

Fiscal Year End	Brokerage Fees
February 28, 2021	\$22,069
February 28, 2022	\$13,875
February 28, 2023	\$16,529

Portfolio Managers. Gary Stringer, CFA, Kim Escue, CFA, and Chad Keller, CFP, are the Fund’s portfolio managers and are responsible for the day-to-day management of the Fund. Each portfolio manager is compensated through salary, bonus and equity ownership of Laurus Principal Group LLC. Their compensation is not determined by assets under management or performance of the Fund.

Other Accounts. As of February 28, 2023, the portfolio managers were responsible for managing the following types of accounts (other than the Funds):

Portfolio Manager	Account Type	Performance-Based Fees		Non-Performance-Based Fees	
		Number of Accounts	Total Assets	Number of Accounts	Total Assets
Gary Stringer	Registered Investment Company	0	\$0	0	\$0
	Other Pooled Investment Vehicles	0	\$0	0	\$0
	Other Accounts	0	\$0	3,114	\$672 million
Kim Escue	Registered Investment Company	0	\$0	0	\$0
	Other Pooled Investment Vehicles	0	\$0	0	\$0
	Other Accounts	0	\$0	3,114	\$672 million
Chad Keller	Registered Investment Company	0	\$0	0	\$0
	Other Pooled Investment Vehicles	0	\$0	0	\$0
	Other Accounts	0	\$0	3,114	\$672 million

Ownership of Securities. The table below shows the amount of Fund equity securities beneficially owned by each portfolio manager as of February 28, 2023 stated as one of the following ranges: A = None; B = \$1-\$10,000; C = \$10,001-\$50,000; D = \$50,001-\$100,000; E = \$100,001-\$500,000; F = \$500,001-\$1,000,000; and G = over \$1,000,000.

Name of Portfolio Manager	Dollar Range of Equity Securities in the Fund
Gary Stringer	C

Kim Escue	B
Chad Keller	B

Conflicts of Interest. The portfolio managers' management of accounts other than the Fund may give rise to potential conflicts of interest in connection with his/her management of the Fund's investments, on the one hand, and the investments of the other accounts (the "Other Accounts"), on the other. The Other Accounts might have similar investment objectives as the Fund, track the same indices the Fund tracks or otherwise hold, purchase or sell securities that are eligible to be held, purchased or sold by the Fund. While the portfolio managers' management of other accounts may give rise to the following potential conflicts of interest, the Adviser does not believe that the conflicts, if any, are material or, to the extent any such conflicts are material, the Adviser believes that it has designed policies and procedures that are designed to manage those conflicts in an appropriate way.

Knowledge of the Timing and Size of Fund Trades: A potential conflict of interest may arise as a result of the portfolio managers' day-to-day management of the Fund. The portfolio managers know the size and timing of trades for the Fund and the Other Accounts, and may be able to predict the market impact of Fund trades. It is theoretically possible that the portfolio managers could use this information to the advantage of Other Accounts her/she manages and to the possible detriment of the Fund, or vice versa.

Investment Opportunities: The Adviser may provide investment supervisory services for a number of investment accounts that have varying investment guidelines. Differences in the compensation structures of the Adviser's various accounts may give rise to a conflict of interest by creating an incentive for the Adviser to allocate the investment opportunities it believes might be the most profitable to the client accounts that may benefit the most from the investment gains.

Administrator. M3Sixty Administration, LLC ("M3Sixty"), with principal offices at 4300 Shawnee Mission Parkway, Suite 100, Fairway, KS 66205, provides accounting, administrative, transfer agency, dividend disbursing agency and shareholder servicing agency services for the Fund pursuant to an Investment Company Services Agreement (the "Services Agreement"). Under the Services Agreement, M3Sixty is responsible for a wide variety of functions, including but not limited to: (a) Fund accounting services; (b) financial statement preparation; (c) valuation of the Fund's portfolio securities; (d) pricing the Fund's shares; (e) assistance in preparing tax returns; (f) preparation and filing of required regulatory reports; (g) communications with shareholders; (h) coordination of Board and shareholder meetings; (i) monitoring the Fund's legal compliance; and (j) maintaining shareholder account records. M3Sixty is not affiliated with the Advisor.

During the prior three fiscal years, M3Sixty received the following fees from the Fund for its services as Administrator, Fund Accountant, and Transfer Agent:

Fiscal Year Ended	Administration Fee
February 28, 2021	\$114,563
February 28, 2022	\$160,711
February 28, 2023	\$149,185

Distributor. Matrix 360 Distributors, LLC acts as the principal underwriter and distributor (the "Distributor") of the Fund's shares for the purpose of facilitating the registration of shares of the Fund under state securities laws and to assist in sales of Fund shares pursuant to a Distribution Agreement between the Trust on behalf of the Fund and the Distributor (the "Distribution Agreement") approved by the Trustees. The Distributor is a

broker-dealer registered with the SEC and a member in good standing of the Financial Industry Regulatory Authority, Inc. and maintains, at its own expense, its qualification as a broker-dealer under all applicable federal or state laws in those states which the Fund shall from time to time identify to the Distributor as states in which it wishes to offer its shares for sale, in order that state registrations may be maintained for the Fund. Shares of the Fund are sold on a continuous basis. The Distribution Agreement requires the Distributor to use all reasonable efforts in connection with the distribution of the Fund's shares. However, the Distributor has no obligation to sell any specific number of shares and will only sell shares for orders it receives. The Distribution Agreement may be terminated by either party upon 60-days' prior written notice to the other party. The Fund did not pay any fees incurred under the Distribution Agreement for fiscal years ended the last day of February 2023, 2022, and 2021. The Adviser paid all fees incurred under the Distribution Agreement, if any.

For the fiscal year ended the last day of February 2023, 2022, and 2021, the total sales charges paid in connection with the sales of Class A shares of the Fund and the amounts retained by the Distributor are listed below:

Fund	2023		2022		2021	
	Sales Charges	Amount Retained	Sales Charges	Amount Retained	Sales Charges	Amount Retained
Stringer Growth Fund	\$2,053	\$368	\$5,798	\$1,123	\$1,395	\$281

The Fund has adopted a Distribution Plan ("Plan") pursuant to Rule 12b-1 of the 1940 Act (see "Administration – Distribution of Shares" in the Prospectus and "Purchases, Redemptions and Special Shareholder Services – Additional Information" below). As required by Rule 12b-1, the Plan (together with the Distribution Agreement) was approved by the Trustees and separately by a majority of the Trustees who are not interested persons of the Trust and who have no direct or indirect financial interest in the operation of the Plan and the Distribution Agreement. The Plan provides that the Trust's Treasurer shall provide to the Trustees, at least quarterly, a written report of the amounts expended pursuant to the Plan and the purposes of such expenditures. The continuation of the Plan must be considered by the Trustees annually.

Potential benefits of the Plan to the Fund include improved shareholder services and savings to each Fund in certain operating expenses. It is anticipated that the Plan will benefit shareholders because an effective sales program typically is necessary in order for the Fund to reach and maintain a sufficient size to achieve efficiently investment objectives and to realize economies of scale.

Under the Plan, the Fund may use 12b-1 fees to compensate broker-dealers (including, without limitation, the Distributor) for sales of Fund shares, or for other expenses associated with distributing Fund shares. The Fund may expend up to 1.00% for Class C shares and up to 0.25% for Class A shares of the Fund's average daily net assets annually to pay for any activity primarily intended to result in the sale of shares of the Fund and the servicing of shareholder accounts, provided that the Trustees have approved the category of expenses for which payment is being made. Under ordinary circumstances, the Fund expects sales of Fund shares to involve a payment to broker-dealers; however, certain sales of Fund shares (*e.g.*, sales to: (1) to current and retired officers and Trustees of the Trust; to clients (including custodial, agency, advisory and trust accounts) and current and retired officers and employees of the Adviser; to officers and employees of M3Sixty and the Distributor; to persons associated with law firms, consulting firms and others providing services to the Trust; and to such persons' spouses, parents, siblings and lineal descendants and their beneficial accounts; or (2) to investors purchasing amounts of Class A shares greater than \$3 million) may be made with or without remitting compensation to any broker-dealer.

12b-1 Fees paid by the Fund for the fiscal year ended February 28, 2023:

Class A	\$ 10,445*
Class C	\$ 63,903**

*Compensation to broker-dealers.

**Compensation to brokers-dealers (\$56,818) and to the Adviser (\$7,085).

Custodian. Fifth Third Bank (“Custodian”), 38 Fountain Square Plaza, Cincinnati, Ohio 45263, serves as custodian for the Fund’s assets. The Custodian acts as the depository for the Fund, safekeeps its portfolio securities, collects all income and other payments with respect to portfolio securities, disburses monies at the Fund’s request and maintains records in connection with its duties as Custodian.

Independent Registered Public Accounting Firm. The Trustees have selected Cohen & Company, Ltd., 1835 Market Street, Suite 310, Philadelphia, PA 19103, to serve as independent registered public accounting firm for the Fund for the current fiscal year and to audit the annual financial statements of the Fund, prepare the Fund’s federal, state and excise tax returns and consult with the Fund on matters of accounting and federal and state income taxation.

Independent registered public accounting firm will audit the financial statements of the Fund at least once each year. Shareholders will receive annual audited and semi-annual (unaudited) reports when published and written confirmation of all transactions in their account. A copy of the most recent Annual Report will accompany the SAI whenever a shareholder or a prospective investor requests it.

Legal Counsel. FinTech Law, LLC, located at 6224 Turpin Hills Drive, Cincinnati, OH 45244 serves as legal counsel to the Trust.

CODE OF ETHICS

The Trust, the Adviser and the Distributor each have adopted a code of ethics, as required by applicable law, which is designed to prevent affiliated persons of the Trust, the Adviser and the Distributor from engaging in deceptive, manipulative or fraudulent activities in connection with securities held or to be acquired by the Fund (which may also be held by persons subject to a code). Each code permits the applicable entity’s employees and officers to invest in securities, subject to certain restrictions and pre-approval requirements. In addition, the Trust’s and Adviser’s codes require that portfolio managers and other investment personnel of the Adviser report their personal securities transactions and holdings, which are reviewed for compliance with the code of ethics.

PROXY VOTING POLICIES

The Trust has adopted a proxy voting and disclosure policy that delegates to the Adviser the authority to vote proxies for the Fund, subject to oversight of the Trustees. Copies of the Trust’s Proxy Voting and Disclosure Policy and the Adviser’s Proxy Voting Policy and Procedures are included as Appendix A to this SAI.

Each year the Fund is required to file Form N-PX stating how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30th, within 60 days after the end of such period. Information regarding how the Fund voted proxies as set forth in its most recent filing of Form N-PX will be available (1) without charge, upon request, by calling the Fund at (877) 244-6235; and (2) on the SEC’s website at <http://www.sec.gov>.

PURCHASES, REDEMPTIONS AND SPECIAL SHAREHOLDER SERVICES

Purchases. Reference is made to “Purchasing Shares” in the Fund’s Prospectus for more information concerning how to purchase shares. Specifically, potential investors should refer to the Prospectus for information regarding purchasing shares by mail or bank wire, and for information regarding telephone orders. Potential investors should also refer to the Prospectus for information regarding the Fund’s three classes of shares (Class A, Class C and Institutional Class shares) and their respective fees and expenses. The Prospectus also describes the Fund’s automatic investment plan and certain rights reserved by the Fund with respect to orders for Fund shares. The following information supplements the information regarding share purchases in the Prospectus:

Pricing of Orders. Shares of the Fund will be offered and sold on a continuous basis. The purchase price of shares of the Fund is based on the net asset value next determined after the order is received, subject to the order being accepted by the Fund in good form. Net asset value is normally determined at 4:00 p.m. Eastern time, as described under “Net Asset Value” below. Notwithstanding the foregoing, Class A shares are generally subject to an initial sales load as described in the Prospectus.

Regular Accounts. The regular account allows for voluntary investments to be made at any time. Available to individuals, custodians, corporations, trusts, estates, corporate retirement plans and others, investors are free to make additions and withdrawals to or from their account as often as they wish. When an investor makes an initial investment in the Fund, a shareholder account is opened in accordance with the investor’s registration instructions. Each time there is a transaction in a shareholder account, such as an additional investment or the reinvestment of a dividend or distribution, the shareholder will receive a confirmation statement showing the current transaction and all prior transactions in the shareholder account during the calendar year to date, along with a summary of the status of the account as of the transaction date.

Purchases in Kind. The Fund may accept securities in lieu of cash in payment for the purchase of shares in the Fund. The acceptance of such securities is at the sole discretion of the Adviser based upon the suitability of the securities accepted for inclusion as a long-term investment of the Fund, the marketability of such securities, and other factors that the Adviser may deem appropriate. If accepted, the securities will be valued using the same criteria and methods as described in “Investing in the Fund - Determining each Fund’s Net Asset Value” in the Prospectus.

Share Certificates. The Fund normally does not issue stock certificates. Evidence of ownership of shares is provided through entry in the Fund’s share registry. Investors will receive periodic account statements (and, where applicable, purchase confirmations) that will show the number of shares owned.

Redemptions. Reference is made to “Redeeming Shares” in the Prospectus for more information concerning how to redeem shares. Specifically, investors wishing to redeem shares in the Fund should refer to the Prospectus for information regarding redeeming shares by mail, telephone/fax or bank wire. The Prospectus also describes contingent deferred sales charges (“CDSCs”) that apply to purchases of Class C shares of the Fund and to certain purchases of Class A shares of the Fund. The Prospectus also describes the Fund’s policy regarding accounts that fall below the Fund’s required minimums, redemptions in kind, signature guarantees and other information about the Fund’s redemption policies. The following information supplements the information regarding share redemptions in the Prospectus:

Suspension of Redemption Privileges and Postponement of Payment. The Fund may suspend redemption privileges or postpone the date of payment (i) during any period that the New York Stock Exchange (the “NYSE”) is closed for other than customary weekend and holiday closings, or that trading on the NYSE is restricted as determined by the SEC; (ii) during any period when an emergency exists as

defined by the rules of the SEC as a result of which it is not reasonably practicable for the Fund to dispose of securities owned by it, or to determine fairly the value of its assets; and (iii) for such other periods as the SEC may permit. The Fund may also suspend or postpone the recordation of the transfer of shares upon the occurrence of any of the foregoing conditions. Any redemption may be more or less than the shareholder's cost depending on the market value of the securities held by the Fund. No charge is made by the Fund for redemptions other than the possible charge for wiring redemption proceeds, and the assessment of a CDSC on certain redemptions of Fund shares occurring within one year following the issuance of such shares. For information on the CDSCs that apply to purchases of Class C shares and to certain purchases of Class A shares, see "Redeeming Shares – Contingent Deferred Sales Charges" in the Prospectus.

Involuntary Redemptions. In addition to the situations described in the Prospectus under "Redeeming Shares," the Fund may redeem shares involuntarily to reimburse the Fund for any loss sustained by reason of the failure of a shareholder to make full payment for shares purchased by the shareholder or to collect any charge relating to a transaction effected for the benefit of a shareholder which is applicable to Fund shares as provided in the Prospectus from time to time.

Additional Information. Following is additional information regarding certain services and features related to purchases, redemptions and distribution of Fund shares. Investors who have questions about any of this information should call the Fund at (877) 244-6235.

Reduced Sales Loads. Front-end sales loads on purchases of Class A shares may be reduced under the "Right of Accumulation" or under a "Letter of Intent." To receive a reduced sales load, you must inform your broker-dealer or the Fund at the time you purchase shares that you qualify for such a reduction. If you do not let your broker-dealer or the Fund know you are eligible for a reduced sales charge, you may not receive the discount to which you are otherwise entitled.

You may use the "Right of Accumulation" to reduce your sales load. Under the "Right of Accumulation," you may combine the current net asset value of your existing Class A shares of the Fund or any fund in the Stringer family with the amount of any current purchases in the Fund or funds in the Stringer family of funds in order to take advantage of the reduced sales loads with higher amounts of investment in the Fund.

Purchases made pursuant to a "Letter of Intent" may also be eligible for the reduced sales loads. In a Letter of Intent, the investor expresses his or her intention, in writing, to invest a certain amount over a specified period of time. The Fund will then apply to each of the investor's periodic investments the reduced sales load that would apply to the total amount stated in the Letter of Intent. The minimum initial investment under a Letter of Intent is \$100,000. If not stated otherwise in the Letter of Intent, the amount of shares you purchase in the Fund during the thirteen (13) months following the signing of the Letter of Intent qualify for the reduced sales load. The reduced sales load will not apply to purchases in the Fund made more than 90 days prior to the signing of the Letter of Intent. During the term of your Letter of Intent, the Transfer Agent will hold in escrow shares representing the highest applicable sales load for the Fund each time you make a purchase. Any shares you redeem during that period will count against your total amount stated in your Letter of Intent. If, by the end of the term of the Letter of Intent, you have purchased all the shares you committed to purchase in the Letter of Intent, the escrowed shares will be released to you. If you have not purchased all the shares you committed to purchase in the Letter of Intent, your escrowed shares will be redeemed in an amount equal to the sales load that would apply if you had purchased the actual amount in your account all at once. Any escrowed shares not needed to satisfy that sales load would be released to you.

Shareholders may include the value of certain related accounts, including accounts held by their

spouse and children under the age of 21, family trust accounts of the investor and other accounts held by the investor to determine the applicable sales load and for purposes of the Right of Accumulation and Letter of Intent privileges. These privileges apply even if your related accounts are opened at different brokerage firms, so it is important to let your broker-dealer(s) or the Transfer Agent know about all your accounts that may be combined. To verify eligibility for a reduced sales load, your broker-dealer or the Fund may require that you submit copies of account statements to substantiate requests for Right of Accumulation and Letter of Intent privileges.

Class A shares may be sold at net asset value, without a sales charge, to current and retired officers and Trustees of the Trust; to clients (including custodial, agency, advisory and trust accounts) and current and retired officers and employees of the Adviser; to officers and employees of M3Sixty and the Distributor; to persons associated with law firms, consulting firms and others providing services to the Trust; and to such persons' spouses, parents, siblings and lineal descendants and their beneficial accounts. Such shares may also be issued at net asset value (1) in connection with the merger (or similar transaction) of an investment company (or series or class thereof) or personal holding company with the Fund (or class thereof), and (2) to investment advisers, financial planners or other intermediaries who place trades for their own accounts or the accounts of their clients and who charge a management, consulting or other fee for their services; and to clients of such investment advisers, financial planners or other intermediaries who place trades for their own accounts if the accounts are linked to the master account of such investment adviser, financial planner or other intermediary on the books and records of the broker or agent. Sales charges generally are waived in the foregoing cases because either (i) there is no sales effort involved in the sale of shares; or (ii) the investor is paying a fee (other than the sales charge) to the broker-dealer or other financial intermediary or adviser involved in the sale.

Transfer of Registration. To transfer shares to another owner, send a written request to the Fund at 360 Funds, 4300 Shawnee Mission Parkway, Suite 100, Fairway, KS 66205. Your request should include the following: (1) the Fund's name and existing account registration; (2) signature(s) of the registered owner(s) exactly as the signature(s) appear(s) on the account registration; (3) the new account registration, address, social security or taxpayer identification number, and how dividends and capital gains are to be distributed; (4) signature guarantees (*See* the Prospectus under the heading "Redeeming Shares - Signature Guarantees"); and (5) any additional documents which are required for transfer by corporations, administrators, executors, trustees, guardians, etc. If you have any questions about transferring shares, call or write the Fund.

Mailing Shareholder Communications. Accounts having the same mailing address may consent in writing to sharing a single mailing of shareholder reports, proxy statements (but each such shareholder would receive his/her own proxy) and other Fund literature.

Plan under Rule 12b-1. As discussed in the "Management and Administration – Distributor" section above, the Fund has adopted a Distribution Plan ("Plan") pursuant to Rule 12b-1 of the 1940 Act for the Fund. Under the Plan, the Fund may pay for services related to the distribution of shares of the Fund with up to 1.00% of the Fund's assets on an annual basis for Class C shares and up to 0.25% of the Fund's assets on an annual basis for Class A shares. The Trustees will take into account the expenditures for purposes of reviewing operations under the Plan and in connection with their annual consideration of renewal of the Plan. The Distributor has indicated that it expects its expenditures to include, without limitation: (a) the printing and mailing of Fund prospectuses, statements of additional information, any supplements thereto and shareholder reports for prospective shareholders with respect to shares of the Fund; (b) those relating to the development, preparation, printing and mailing of advertisements, sales literature and other promotional materials describing and/or relating to shares of the Fund; (c) obtaining information and providing explanations to wholesale and retail distributors of contracts regarding Fund investment objectives and

policies and other information about the Fund, including the performance of the Fund; (d) training sales personnel regarding the shares of the Fund; and (e) financing any activity that the Distributor determines is primarily intended to result in the sale of Fund shares. Under the Plan, the Distributor is compensated regardless of its out-of-pocket expenditures. The Fund does not participate in any joint distribution activities with other investment companies nor is the Fund aware of any interested person of the Fund or any director who is not an interested person of the Fund having any direct or indirect financial interest in the Plan or related agreements.

Dealers. The Distributor, at its expense, may provide additional compensation in addition to dealer discounts and brokerage commissions to dealers in connection with sales of shares of the Fund. Compensation may include financial assistance to dealers in connection with conferences, sales or training programs for their employees, seminars for the public, advertising campaigns regarding the Fund, and/or other dealer-sponsored special events, to the extent permitted under applicable law and the rules and regulations of the FINRA. None of the aforementioned compensation is paid directly by the Fund or its shareholders although the Distributor may use a portion of the payment it receives under the Distribution Plan to pay these expenses.

Additional Information About Redemptions. The right to redeem shares of the Fund can be suspended and the payment of the redemption price deferred when the NYSE is closed (other than for customary weekend and holiday closings), during periods when trading on the NYSE is restricted as determined by the SEC, or during any emergency as determined by the SEC which makes it impracticable for the Fund to dispose of its securities or value its assets, or during any other period permitted by order of the SEC for the protection of investors.

Due to the high cost of maintaining small accounts, the Trust reserves the right to redeem accounts with balances of less than \$1,000.00. Prior to such redemption, shareholders will be given 60 days' written notice to make an additional purchase. However, no such redemption would be required by the Trust if the cause of the low account balance was a reduction in the net asset value of shares. No CDSC will be imposed with respect to such involuntary redemptions.

The Fund does not intend, under normal circumstances, to redeem shares by payment in kind. It is possible, however, that conditions may arise in the future that would, in the opinion of the Trustees, make it undesirable for the Fund to pay for all redemptions in cash. In such a case, the Trustees may authorize payment to be made in readily marketable portfolio securities of the Fund. Securities delivered in payment of redemptions would be valued at the same value assigned to them in computing the net asset value per share. Shareholders receiving them would incur brokerage costs when these securities are sold.

NET ASSET VALUE

The net asset value and net asset value per share of the Fund normally is determined at the time regular trading closes on the NYSE (currently 4:00 p.m., New York time, Monday through Friday), except on business holidays when the NYSE is closed. The NYSE recognizes the following holidays: New Year's Day, Martin Luther King, Jr. Day, President's Day, Good Friday, Memorial Day, Juneteenth, Fourth of July, Labor Day, Thanksgiving Day, and Christmas Day. Any other holiday recognized by the NYSE will be considered a business holiday on which the net asset value of shares of the Fund will not be calculated.

In computing the Fund's net asset value, all liabilities incurred or accrued are deducted from its net assets. The resulting net assets are divided by the number of shares of the Fund outstanding at the time of the valuation and the result is the net asset value per share of the Fund.

The pricing and valuation of portfolio securities is determined in good faith in accordance with procedures established by, and under the direction of, the Trustees. The Fund's investments are valued based on market value or, if no market value is readily available, based on the determination of the Adviser, which has been designated by the Board as the valuation designee for the Fund pursuant to Rule 2a-5 under the Investment Company Act. Values are determined according to accepted accounting practices and all laws and regulations that apply. Using methods approved by the Trustees, the assets of the Fund are valued as follows:

- Securities that are listed on a securities exchange are valued at the last quoted sales price at the time the valuation is made. Price information on listed securities is taken from the exchange where the security is primarily traded by the Fund.
- Securities that are listed on an exchange and which are not traded on the valuation date are valued at the bid price.
- Unlisted securities for which market quotations are readily available are valued at the latest quoted sales price, if available, at the time of valuation, otherwise, at the latest quoted bid price.
- Temporary cash investments with maturities of 60 days or less will be valued at amortized cost, which approximates market value.
- Securities for which no current quotations are readily available are valued at fair value as determined in good faith using methods approved by the Trustees. Securities may be valued on the basis of prices provided by a pricing service when such prices are believed to reflect the fair market value of such securities.
- Securities may be valued on the basis of prices provided by a pricing service when such prices are believed to reflect the fair value of such securities.

Subject to the provisions of the Trust Instrument, determinations by the Trustees as to the direct and allocable liabilities of the Fund and the allocable portion of any general assets are conclusive. As described in the Prospectus, the Adviser is responsible for notifying the Trustees or the Trust's Fair Value Committee valuing the Fund's securities, including when it believes that fair value pricing is required for a particular security. The Board has designated the Adviser its valuation designee pursuant to Rule 2a-5 under the 1940 Act. The Adviser or its delegates may use independent pricing services to obtain valuations of securities. The pricing services rely primarily on prices of actual market transactions as well as on trade quotations obtained from third parties. Prices are generally determined using readily available market prices. If market prices are unavailable or believed to be unreliable, the Adviser will make a good faith determination as to the "fair value" of the security using procedures approved by the Trustees. The pricing services may use a matrix system to determine valuations of fixed-income securities when market prices are not readily available. This system considers such factors as security prices, yields, maturities, call features, ratings and developments relating to specific securities in arriving at valuations. The procedures used by any such pricing service and its valuation results are reviewed by the Adviser, as the valuation designee. The Fund may hold portfolio securities that are listed on foreign exchanges. Under certain circumstances, these investments may be valued under the Adviser's fair value policies and procedures, such as when U.S. exchanges are open but a foreign exchange is closed. Securities with remaining maturities of 60 days or less may be valued by the amortized cost method, which involves valuing a security at its cost on the date of purchase and thereafter (absent unusual circumstances) assuming a constant amortization of maturity of any discount or premium, provided such amount approximates market value.

ADDITIONAL TAX INFORMATION

The following summarizes certain additional tax considerations affecting the Funds and their shareholders. No attempt is made to present a detailed explanation of the tax treatment of the Funds or their shareholders, not does the information cover all aspects of U.S. federal income taxation that might be relevant to beneficial owners of Fund shares. The discussions here and in the Prospectus are not intended as a substitute for careful tax planning and are based on current the Internal Revenue Code of 1986, as amended (the “Code”), applicable U.S. Treasury Regulations (the “Regulations”), and administrative and judicial interpretations thereof, all of which are subject to change by legislative, judicial, or administrative action; such changes can even be retroactive. The summary applies only to beneficial owners of a Fund’s shares in whose hands such shares are capital assets within the meaning of Section 1221 of the Code, and may not apply to certain types of beneficial owners of a Fund’s shares, including, but not limited to insurance companies, tax-exempt organizations, shareholders holding a Fund’s shares through tax-advantaged accounts (such as an individual retirement account (an “IRA”), a 401(k) plan account, or other qualified retirement account), financial institutions, pass-through entities, broker-dealers, entities that are not organized under the laws of the United States or a political subdivision thereof, persons who are neither a citizen nor resident of the United States, shareholders holding a Fund’s shares as part of a hedge, straddle or conversion transaction, and shareholders who are subject to the alternative minimum tax. Persons who may be subject to tax in more than one country should consult the provisions of any applicable tax treaty to determine the potential tax consequences to them.

Shareholders are advised to consult their tax advisors with specific reference to their own tax situations.

No Fund has requested nor will any Fund request an advance ruling from the IRS as to the federal income tax matters described below. The IRS could adopt positions contrary to those discussed below and such positions could be sustained. In addition, the following discussion applicable to shareholders of a Fund addresses only some of the federal income tax considerations affecting investments in such Fund.

Qualification as a Regulated Investment Company (“RIC”). Qualification as a RIC under the Code requires, among other things, that each Fund: (a) derive at least 90% of its gross income for each taxable year from (i) dividends, interest, payments with respect to securities loans and gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including but not limited to gains from options, futures and forward contracts) derived with respect to its business of investing in such stock, securities or currencies, and (ii) net income from interests in qualified publicly traded partnerships (together with (i), the “Qualifying Income Requirement”); (b) diversify its holdings so that, at the close of each quarter of the taxable year: (i) at least 50% of the value of its total assets is comprised of cash, cash items (including receivables), U.S. government securities, securities of other RICs and other securities, with those other securities limited, in respect of any one issuer, to an amount that does not exceed 5% of the value of its total assets and that does not represent more than 10% of the outstanding voting securities of such issuer; and (ii) not more than 25% of the value of its assets is invested in the securities (other than U.S. government securities or securities of other RICs) of any one issuer or the securities (other than the securities of other RICs) of two or more issuers controlled by it and engaged in the same, similar or related trades or businesses, or the securities of one or more “qualified publicly traded partnerships” (together with (i) the “Diversification Requirement”); and (c) distribute for each taxable year at least the sum of (i) 90% of its investment company taxable income (which includes dividends, taxable interest, taxable original issue discount income, market discount income, income from securities lending, net short-term capital gain in excess of net long-term capital loss, certain net realized foreign currency exchange gains, and any other taxable income other than “net capital gain” as defined below and is reduced by deductible expenses) determined without regard to any deduction for dividends paid; and (ii) 90% of its tax-exempt interest, if any, net of certain expenses allocable thereto (“net tax-exempt interest”).

Each Fund may use “equalization payments” in determining the portion of its net investment income and net realized capital gains that have been distributed. A Fund that elects to use equalization payments will allocate a portion of its investment income and capital gains to the amounts paid in redemption of Fund shares, and such income and gains will be deemed to have been distributed by the Fund for purposes of the distribution requirements described above. This may have the effect of reducing the amount of income and gains that the Fund is required to distribute to shareholders for the fund to avoid federal income tax and excise tax and may defer the recognition of taxable income by shareholders. This process does not affect the tax treatment of redeeming shareholders and, since the amount of any undistributed income and/or gains will be reflected in the value of the Fund’s shares, the total return on a shareholder’s investment will not be reduced because of the Fund’s distribution policy. The IRS has not published any guidance concerning the methods to be used in allocating investment income and capital gain to redemptions of shares. If the IRS determines that a Fund is using an improper method of allocation and has under-distributed its net investment income or net realized capital gains for any taxable year, such Fund may be liable for additional federal income or excise tax or may jeopardize its treatment as a RIC.

The U.S. Treasury Department is authorized to promulgate regulations under which gains from foreign currencies (and options, futures, and forward contracts on foreign currency) would constitute qualifying income for purposes of the Qualifying Income Requirement only if such gains are directly related to the principal business of a Fund of investing in stock or securities or options and futures with respect to stock or securities. To date, the U.S. Treasury Department has not issued such regulations.

As a RIC, a Fund generally will not be subject to U.S. federal income tax on the portion of its income and capital gains that it distributes to its shareholders in any taxable year for which it distributes, in compliance with the Code’s timing and other requirements at least the sum of 90% of its investment company taxable income (determined without regard to the deduction for dividends paid) and 90% of its net tax-exempt interest. Each Fund may retain for investment all or a portion of its net capital gain (*i.e.*, the excess of its net long-term capital gain over its net short-term capital loss). If a Fund retains any investment company taxable income or net capital gain, it will be subject to tax at regular corporate rates on the amount retained. If a Fund retains any net capital gain, it may designate the retained amount as undistributed net capital gain in a notice to its shareholders, who will be (i) required to include in income for federal income tax purposes, as long-term capital gain, their shares of such undistributed amount; and (ii) entitled to credit their proportionate shares of tax paid by such Fund against their federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. For federal income tax purposes, the tax basis of the shares owned by a shareholder of a Fund will be increased by the amount of undistributed net capital gain included in the shareholder’s gross income and decreased by the federal income tax paid by such Fund on that amount of capital gain.

The Qualifying Income Requirement and Diversification Requirement that must be met under the Code for a Fund to qualify as a RIC, as described above, may limit the extent to which it will be able to engage in derivative transactions. Rules governing the federal income tax aspects of derivatives, including swap agreements, are not entirely clear in certain respects, particularly considering two IRS revenue rulings issued in 2006. Revenue Ruling 2006-1 held that income from a derivative contract with respect to a commodity index is not qualifying income for a RIC. Subsequently, the IRS issued Revenue Ruling 2006-31 in which it stated that the holding in Revenue Ruling 2006-1 “was not intended to preclude a conclusion that the income from certain instruments (such as certain structured notes) that create a commodity exposure for the holder is qualifying income.” Accordingly, the Qualifying Income Requirement may limit each Fund’s ability to invest in commodity-related derivative transactions and other derivative transactions. Each Fund will account for any investments in commodity derivative transactions in a manner it deems to be appropriate; the IRS,

however, might not accept such treatment. If the IRS did not accept such treatment, the status of such Fund as a RIC might be jeopardized.

In general, for purposes of the Qualifying Income Requirement described above, income derived from a partnership is treated as qualifying income only to the extent such income is attributable to items of income of the partnership which would be qualifying income if realized directly by the RIC. However, all of the net income of a RIC derived from an interest in a qualified publicly traded partnership (defined as a partnership (x) the interests in which are traded on an established securities market or are readily tradable on a secondary market or the substantial equivalent thereof, and (y) that meets certain qualifying income requirements but derives less than 90% of its income from the qualifying income described in clause (i) of the Qualifying Income Requirement described above) will be treated as qualifying income. In general, such entities will be treated as partnerships for federal income tax purposes if they meet the passive income requirement under Section 7704(c)(2) of the Code. In addition, although in general the passive loss rules of the Code do not apply to RICs, such rules do apply to a RIC with respect to items attributable to an interest in a qualified publicly traded partnership.

For purposes of the Diversification Requirement described above, the term “outstanding voting securities of such issuer” will include the equity securities of a qualified publicly traded partnership.

If a Fund fails to satisfy the Qualifying Income Requirement or the Diversification Requirement in any taxable year, such Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain de minimis failures to satisfy the Diversification Requirements where the Fund corrects the failure within a specified period. If the applicable relief provisions are not available or cannot be met, such Fund will fail to qualify as a RIC and will be subject to federal income tax in the same manner as an ordinary corporation at a tax rate of 21% and all distributions from earnings and profits (as determined under U.S. federal income tax principles) to its shareholders will be taxable as ordinary dividend income eligible for the dividends-received deduction for corporate shareholders and for qualified dividend income treatment for non-corporate shareholders.

Excise Tax. If a Fund fails to distribute by December 31 of each calendar year an amount equal to the sum of (1) at least 98% of its taxable ordinary income (excluding capital gains and losses) for such year, (2) at least 98.2% of the excess of its capital gains over its capital losses (as adjusted for certain ordinary losses) for the twelve month period ending on October 31 of such year, and (3) all taxable ordinary income and the excess of capital gains over capital losses for the prior year that were not distributed during such year and on which it did not pay federal income tax, such Fund will be subject to a nondeductible 4% excise tax (the “Excise Tax”) on the undistributed amounts. A distribution will be treated as paid on December 31 of the calendar year if it is declared by a Fund in October, November, or December of that year to shareholders of record on a date in such month and paid by it during January of the following year. Such distributions will be taxable to shareholders (other than those not subject to federal income tax) in the calendar year in which the distributions are declared, rather than the calendar year in which the distributions are received. Each Fund intends to actually distribute or be deemed to have distributed substantially all its net income and gain, if any, by the end of each calendar year in compliance with these requirements so that it will not be required to pay the Excise Tax. A Fund may in certain circumstances be required to liquidate its investments to make sufficient distributions to avoid the Excise Tax liability at a time when its Advisor might not otherwise have chosen to do so. Liquidation of investments in such circumstances may affect the ability of a Fund to satisfy the requirements for qualification as a RIC. However, no assurances can be given that a Fund will not be subject to the Excise Tax and, in fact, in certain instances if warranted, a Fund may choose to pay the Excise Tax as opposed to making an additional distribution.

Capital Loss Carryforwards. For capital losses realized with respect to a tax year of a Fund that exceeds the Fund's capital gains for such years, the Fund may carry such excess capital losses forward indefinitely. The excess of a Fund's net short-term capital losses over its net long-term capital gain is treated as short-term capital losses arising on the first day of the Fund's next taxable year and the excess of a Fund's net long-term capital losses over its net short-term capital gain is treated as long-term capital losses arising on the first day of the Fund's next taxable year. If carried forward capital losses offset future capital gains, such future capital gains are not subject to Fund-level federal income taxation, regardless of whether they are distributed to shareholders. A Fund cannot carry back or carry forward any net operating losses.

The amount of capital losses that can be carried forward and used in any single year is subject to an annual limitation if there is a more than 50% "change in ownership" of a Fund. An ownership change generally results when shareholders owning 5% or more of a Fund increase their aggregate holdings by more than 50% over a three-year look-back period. An ownership change could result in capital loss carryovers being used at a slower rate, thereby reducing a Fund's ability to offset capital gains with those losses. An increase in the amount of taxable gains distributed to a Fund's shareholders could result from an ownership change. The Funds undertake no obligation to avoid or prevent an ownership change, which can occur in the normal course of shareholder purchases and redemptions or as a result of engaging in a tax-free reorganization with another fund. Moreover, because of circumstances beyond a Fund's control, there can be no assurance that a Fund will not experience, or has not already experienced, an ownership change. Additionally, if a Fund engages in a tax-free reorganization with another fund, the effect of these and other rules not discussed herein may be to disallow or postpone the use by a Fund of its capital loss carryovers (including any current year losses and built-in losses when realized) to offset its own gains or those of the other fund, or vice versa, thereby reducing the tax benefits Fund shareholders would otherwise have enjoyed from use of such capital loss carryovers.

Constructive Sales. Certain rules may affect the timing and character of gain if a Fund engages in transactions that reduce or eliminate its risk of loss with respect to appreciated financial positions. If a Fund enters into certain transactions (including a short sale, an offsetting notional principal contract, a futures or forward contract, or other transactions identified in U.S. Treasury regulations) in property while holding an appreciated financial position in substantially identical property, it will be treated as if it had sold and immediately repurchased the appreciated financial position and will be taxed on any gain (but not loss) from the constructive sale. The character of gain from a constructive sale will depend upon a Fund's holding period in the appreciated financial position. Loss from a constructive sale would be recognized when the position was subsequently disposed of, and its character would depend on a Fund's holding period and the application of various loss deferral provisions of the Code.

In addition, if the appreciated financial position is itself a short sale, acquisition of the underlying property or substantially identical property by a Fund will be deemed a constructive sale. The foregoing will not apply, however, to a Fund's transaction during any taxable year that otherwise would be treated as a constructive sale if the transaction is closed within 30 days after the end of that year and such Fund holds the appreciated financial position unhedged for 60 days after that closing (i.e., at no time during that 60-day period is such Fund's risk of loss regarding the position reduced by reason of certain specified transactions with respect to substantially identical or related property, such as having an option to sell, being contractually obligated to sell, making a short sale or granting an option to buy substantially identical stock or securities).

Wash Sales. A Fund may in certain circumstances be impacted by special rules relating to "wash sales." In general, the wash sale rules prevent the recognition of a loss by a Fund from the disposition of stock or securities at a loss in a case in which identical or substantially identical stock or securities (or an option to acquire such property) is or has been acquired by it within 30 days before or 30 days after the sale.

Short Sales. A Fund may make short sales of securities. Short sales may increase the amount of short-term capital gain realized by a Fund, which is taxed as ordinary income when distributed to its shareholders. Short sales also may be subject to the “Constructive Sales” rules, discussed above.

Deferral of Late Year Losses. A Fund may elect to treat part or all of any “qualified late year loss” as if it had been incurred in the succeeding taxable year in determining the Fund’s taxable income, net capital gain, net short-term capital gain, and earnings and profits. The effect of this election is to treat any such “qualified late year loss” as if it had been incurred in the succeeding taxable year in characterizing Fund distributions for any calendar year (see, “Taxation of Fund Distributions - Distributions of capital gains” below). A “qualified late year loss” includes:

- (i) any net capital loss, net long-term capital loss, or net short-term capital loss incurred after October 31 of the current taxable year (“post- October losses”), and
- (ii) the excess, if any, of (1) the sum of (a) specified losses incurred after October 31 of the current taxable year, and (b) other ordinary losses incurred after December 31 of the current taxable year, over (2) the sum of (a) specified gains incurred after October 31 of the current taxable year, and (b) other ordinary gains incurred after December 31 of the current taxable year.

The terms “specified losses” and “specified gains” mean ordinary losses and gains from the sale, exchange, or other disposition of property (including the termination of a position with respect to such property), foreign currency losses and gains, and losses and gains resulting from holding stock in a passive foreign investment company (“PFIC”) for which a mark-to-market election is in effect. The terms “ordinary losses” and “ordinary gains” mean other ordinary losses and gains that are not described in the preceding sentence.

Other Regulated Investment Companies. The character of the income or capital gains that a Fund receives from another investment company will pass through to the Fund’s shareholders if the Fund and the other investment company each qualify as RICs under the Code. However, to the extent that another investment company that qualifies as a RIC realizes net losses on its investments for a given taxable year, a Fund will not be able to recognize its share of those losses until it disposes of shares of such investment company. Moreover, even when a Fund does make such a disposition, a portion of its loss may be recognized as a long-term capital loss. As a result of the foregoing rules, and certain other special rules, it is possible that the amounts of net investment income and net capital gains that a Fund will be required to distribute to shareholders will be greater than such amounts would have been had the Fund invested directly in the securities held by the investment companies in which it invests, rather than investing in shares of the investment companies. For similar reasons, the character of distributions from a Fund (e.g., long-term capital gain, qualified dividend income, etc.) will not necessarily be the same as it would have been had the Fund invested directly in the securities held by the investment companies in which it invests.

Passive Foreign Investment Companies. A Fund may invest in a non-U.S. corporation, which could be treated as a PFIC or become a PFIC under the Code. A PFIC is generally defined as a foreign corporation that meets either of the following tests: (1) at least 75% of its gross income for its taxable year is income from passive sources (such as interest, dividends, certain rents and royalties, or capital gains); or (2) an average of at least 50% of its assets produce, or are held for the production of, such passive income. If a Fund acquires any equity interest in a PFIC, such Fund could be subject to federal income tax and interest charges on “excess distributions” received with respect to such PFIC stock or on any gain from the sale of such PFIC stock (collectively “PFIC income”), even if such Fund distributes the PFIC income as a taxable dividend to its shareholders. The balance of the PFIC income will be included in such Fund’s investment company taxable income and, accordingly, will not be taxable to it to the extent it distributes that income to its shareholders. A

Fund's distributions of PFIC income will be taxable as ordinary income even though, absent the application of the PFIC rules, some portion of the distributions may have been classified as capital gain.

A Fund will not be permitted to pass through to its shareholders any credit or deduction for taxes and interest charges incurred with respect to a PFIC. Payment of this tax would therefore reduce a Fund's economic return from its investment in PFIC shares. To the extent a Fund invests in a PFIC, it may elect to treat the PFIC as a "qualified electing fund" ("QEF"), then instead of the tax and interest obligation described above on excess distributions, such Fund would be required to include in income each taxable year its pro rata share of the QEF's annual ordinary earnings and net capital gain. As a result of a QEF election, a Fund would have to distribute to its shareholders an amount equal to the QEF's annual ordinary earnings and net capital gain to satisfy the Code's minimum distribution requirement described herein and avoid imposition of the Excise Tax, even if the QEF did not distribute those earnings and gain to such Fund. In most instances it will be very difficult, if not impossible, to make this election because of certain requirements in making the election.

A Fund may elect to "mark-to-market" its stock in any PFIC. "Marking-to-market," in this context, means including in ordinary income each taxable year the excess, if any, of the fair market value of the PFIC stock over such Fund's adjusted basis therein as of the end of that year. Pursuant to the election, a Fund also may deduct (as an ordinary, not capital, loss) the excess, if any, of its adjusted basis in the PFIC stock over the fair market value thereof as of the taxable year-end, but only to the extent of any net mark-to-market gains with respect to that stock it included in income for prior taxable years under the election. A Fund's adjusted basis in its PFIC stock subject to the election would be adjusted to reflect the amounts of income included and deductions taken thereunder. In either case, a Fund may be required to recognize taxable income or gain without the concurrent receipt of cash.

Foreign Currency Transactions. Foreign currency gains and losses realized by a Fund in connection with certain transactions involving foreign currency-denominated debt instruments, certain options, futures contracts, forward contracts, and similar instruments relating to foreign currency, foreign currencies, and foreign currency-denominated payables and receivables are subject to Section 988 of the Code, which causes such gains and losses to be treated as ordinary income or loss and may affect the amount and timing of recognition of such Fund's income. In some cases elections may be available that would alter this treatment, but such elections could be detrimental to a Fund by creating current recognition of income without the concurrent recognition of cash. If a foreign currency loss treated as an ordinary loss under Section 988 were to exceed a Fund's investment company taxable income (computed without regard to such loss) for a taxable year the resulting loss would not be deductible by it or its shareholders in future years. The foreign currency income or loss will also increase or decrease a Fund's investment company income distributable to its shareholders.

Foreign Taxation. Income received by a Fund from sources within foreign countries may be subject to foreign withholding and other taxes. Tax conventions between certain countries and the United States may reduce or eliminate such taxes. If more than 50% of a Fund's total assets at the close of any taxable year consist of stock or securities of foreign corporations, or if a Fund is a qualified fund of funds (i.e., a RIC that invests at least 50% of its total assets in other RICs at the close of each quarter of its taxable year) and the Fund meets the distribution requirements described above, such Fund may file an election (the "pass-through election") with the IRS pursuant to which shareholders of the Fund would be required to (i) include in gross income (in addition to taxable dividends actually received) their pro rata shares of foreign income taxes paid by the Fund, or in the case of a qualified fund of funds, such taxes paid by an underlying fund that has made the pass-through election, even though not actually received by such shareholders; and (ii) treat such respective pro rata portions as foreign income taxes paid by them. Each Fund will furnish its shareholders

with a written statement providing the amount of foreign taxes paid by the Fund that will “pass-through” for the year, if any.

A credit for foreign taxes is subject to the limitation that it may not exceed the shareholder’s U.S. tax attributable to his or her total foreign source taxable income. For this purpose, if the pass-through election is made, the source of a Fund’s income will flow through to shareholders. The limitation on the foreign tax credit is applied separately to foreign source passive income, and to certain other types of income. Shareholders may be unable to claim a credit for the full amount of their proportionate share of the foreign taxes paid by a Fund. Various limitations, including a minimum holding period requirement, apply to limit the credit and deduction for foreign taxes for purposes of regular federal income tax and alternative minimum tax.

Distributions. Distributions paid out of a Fund’s current and accumulated earnings and profits (as determined at the end of the year), whether reinvested in additional shares or paid in cash, are taxable and must be reported by each shareholder who is required to file a federal income tax return. Distributions in excess of a Fund’s current and accumulated earnings and profits, as computed for federal income tax purposes, will first be treated as a return of capital up to the amount of a shareholder’s tax basis in his or her Fund shares and then as capital gain.

For federal income tax purposes, distributions of net investment income are taxable as ordinary income, and distributions of gains from the sale of investments that a Fund owned (or is treated as owning) for one year or less will be taxable as ordinary income. Distributions designated by a Fund as “capital gain dividends” (distributions from the excess of net long-term capital gain over net short-term capital losses) will be taxable to shareholders as long-term capital gain regardless of the length of time they have held their shares of such Fund. Such dividends do not qualify as dividends for purposes of the dividends received deduction or for qualified dividend income purposes as described below.

Distributions of “qualified dividend income” received by non-corporate shareholders of a Fund may be eligible for the long-term capital gain rate. A Fund’s distribution will be treated as qualified dividend income and therefore eligible for the long-term capital gain rate to the extent the Fund receives dividend income from taxable domestic corporations and certain qualified foreign corporations, provided that certain holding period and other requirements are met. A corporate shareholder of a Fund may be eligible for the dividends received deduction on such Fund’s distributions attributable to dividends received by such Fund from domestic corporations, which, if received directly by the corporate shareholder, would qualify for such a deduction. For eligible corporate shareholders, the dividends received deduction may be subject to certain reductions, and a distribution by a Fund attributable to dividends of a domestic corporation will be eligible for the deduction only if certain holding period and other requirements are met.

An additional 3.8% Medicare tax is imposed on certain net investment income (including dividends and capital gain distributions received from a Fund and net gains from redemptions or other taxable dispositions of shares of a Fund) of U.S. individuals, estates and trusts to the extent that such person’s “modified adjusted gross income” (in the case of an individual) or “adjusted gross income” (in the case of an estate or trust) exceeds a threshold amount.

Each Fund will furnish a statement to shareholders providing the federal income tax status of its dividends and distributions including the portion of such dividends, if any, that qualifies as long-term capital gain.

Different tax treatment, including penalties on certain excess contributions and deferrals, certain pre-retirement and post-retirement distributions, and certain prohibited transactions, is accorded to accounts maintained as qualified retirement plans.

Shareholders are urged and advised to consult their own tax advisors for more information.

Purchases of Fund Shares. Prior to purchasing shares in a Fund, the impact of dividends or distributions which are expected to be or have been declared, but not paid, should be carefully considered. Any dividend or distribution declared shortly after a purchase of shares of a Fund prior to the record date will have the effect of reducing the per share NAV by the per share amount of the dividend or distribution, and to the extent the distribution consists of the Fund's taxable income, the purchasing shareholder will be taxed on the taxable portion of the dividend or distribution received even though some or all of the amount distributed is effectively a return of capital.

Sales, Exchanges, or Redemptions. Upon the disposition of shares of a Fund (whether by redemption, sale, or exchange), a shareholder may realize a capital gain or loss. Such capital gain or loss will be long-term or short-term depending upon the shareholder's holding period for the shares. The capital gain will be long-term if the shares were held for more than 12 months and short-term if held for 12 months or less. If a shareholder sells or exchanges Fund shares within 90 days of having acquired such shares and if, before January 31 of the calendar year following the calendar year of the sale or exchange, as a result of having initially acquired those shares, the shareholder subsequently pays a reduced sales charge on a new purchase of shares of the Fund or another Fund, the sales charge previously incurred in acquiring the Fund's shares generally shall not be taken into account (to the extent the previous sales charges do not exceed the reduction in sales charges on the new purchase) for the purpose of determining the amount of gain or loss on the disposition, but generally will be treated as having been incurred in the new purchase. Any loss realized on a disposition will be disallowed under the "wash sale" rules to the extent that the shares disposed of by the shareholder are replaced by the shareholder (including through dividend reinvestment) within a period of 61 days beginning 30 days before and ending 30 days after the date of disposition. In such a case, the basis of the shares acquired will be adjusted to reflect the disallowed loss. Any loss realized by a shareholder on a disposition of shares held by the shareholder for six months or less will be treated as a long-term capital loss to the extent of any distributions of capital gain dividends received by the shareholder and disallowed to the extent of any distributions of exempt-interest dividends received by the shareholder with respect to such shares unless the Fund declared exempt-interest dividends on a daily basis in an amount equal to at least 90% of its net tax-exempt interest and distributes such dividends on a monthly or more frequent basis. Capital losses are generally deductible only against capital gains except that individuals may deduct up to \$3,000 of capital losses against ordinary income.

The 3.8% Medicare contribution tax (described above) will apply to gains from the sale or exchange of a Fund's shares.

Backup Withholding. Each Fund generally is required to withhold, and remit to the U.S. Treasury, subject to certain exemptions, an amount equal to 24% of all distributions and redemption proceeds paid or credited to a shareholder of such Fund if (i) the shareholder fails to furnish such Fund with the correct taxpayer identification number ("TIN") certified under penalties of perjury, (ii) the shareholder fails to provide a certified statement that the shareholder is not subject to backup withholding, or (iii) the IRS or a broker has notified such Fund that the number furnished by the shareholder is incorrect or that the shareholder is subject to backup withholding as a result of failure to report interest or dividend income. If the backup withholding provisions are applicable, any such distributions or proceeds, whether taken in cash or reinvested in shares, will be reduced by the amounts required to be withheld. Backup withholding is not an additional tax. Any amounts withheld may be credited against a shareholder's U.S. federal income tax liability.

State And Local Taxes. State and local laws often differ from federal income tax laws with respect to the treatment of specific items of income, gain, loss, deduction, and credit. Shareholders are urged and advised to consult their own tax advisors for more information.

Non-U.S. Shareholders. Distributions made to non-U.S. shareholders attributable to net investment income are subject to U.S. federal income tax withholding at a 30% rate (or such lower rate provided under an applicable income tax treaty). However, a Fund will generally not be required to withhold tax on any amounts paid to a non-U.S. investor with respect to dividends attributable to “qualified short-term gain” (i.e., the excess of net short-term capital gain over net long-term capital loss) designated as such by the Fund and dividends attributable to certain U.S. source interest income that would not be subject to federal withholding tax if earned directly by a non-U.S. person, provided such amounts are properly designated by the Fund. A Fund may choose not to designate such amounts.

Notwithstanding the foregoing, if a distribution described above is effectively connected with the conduct of a trade or business carried on by a non-U.S. shareholder within the United States (or, if an income tax treaty applies, is attributable to a permanent establishment in the United States), federal income tax withholding and exemptions attributable to foreign persons will not apply and such distribution will be subject to the federal income tax, reporting and withholding requirements generally applicable to U.S. persons described above.

Under U.S. federal tax law, a non-U.S. shareholder is not, in general, subject to federal income tax or withholding tax on capital gains (and is not allowed a deduction for losses) realized on the sale of shares of a Fund or on capital gain dividends, provided that the Fund obtains a properly completed and signed certificate of foreign status, unless (i) such gains or distributions are effectively connected with the conduct of a trade or business carried on by the non-U.S. shareholder within the United States (or, if an income tax treaty applies, are attributable to a permanent establishment in the United States of the non-U.S. shareholder); (ii) in the case of an individual non-U.S. shareholder, the shareholder is present in the United States for a period or periods aggregating 183 days or more during the year of the sale and certain other conditions are met; or (iii) the shares of the Fund constitute U.S. real property interests (USRPIs), as described below.

Special rules apply to foreign persons who receive distributions from a Fund that are attributable to gains from “United States real property interests” (“USRPIs”). The Code defines USRPIs to include direct holdings of U.S. real property and any interest (other than an interest solely as a creditor) in a “United States real property holding corporation” or former United States real property holding corporation. The Code defines a United States real property holding corporation as any corporation whose USRPIs make up 50% or more of the fair market value of its USRPIs, its interests in real property located outside the United States, plus any other assets it uses in a trade or business. In general, if a Fund is a United States real property holding corporation (determined without regard to certain exceptions), distributions by the Fund that are attributable to (a) gains realized on the disposition of USRPIs by the Fund and (b) distributions received by the Fund from a lower-tier RIC or REIT that the Fund is required to treat as USRPI gain in its hands will retain their character as gains realized from USRPIs in the hands of the foreign persons and will be subject to U.S. federal withholding tax. In addition, such distributions could result in the foreign shareholder being required to file a U.S. tax return and pay tax on the distributions at regular U.S. federal income tax rates. The consequences to a non-U.S. shareholder, including the rate of such withholding and character of such distributions (e.g., ordinary income or USRPI gain) will vary depending on the extent of the non-U.S. shareholder’s current and past ownership of a Fund.

In addition, if a Fund is a United States real property holding corporation or former United States real property holding corporation, the Fund may be required to withhold U.S. tax upon a redemption of shares by a greater-than-5% shareholder that is a foreign person, and that shareholder would be required to file a U.S.

income tax return for the year of the disposition of the USRPI and pay any additional tax due on the gain. However, no such withholding is required with respect to amounts paid in redemption of shares of a fund if the fund is a domestically controlled qualified investment entity, or, in certain other limited cases, if a fund (whether domestically controlled) holds substantial investments in RICs that are domestically controlled qualified investment entities.

Subject to the additional rules described herein, federal income tax withholding will apply to distributions attributable to dividends and other investment income distributed by the Funds. The federal income tax withholding rate may be reduced (and, in some cases, eliminated) under an applicable tax treaty between the United States and the non-U.S. shareholder's country of residence or incorporation. To qualify for treaty benefits, a non-U.S. shareholder must comply with applicable certification requirements relating to its foreign status (by providing a Fund with a properly completed Form W-8BEN).

Sections 1471-1474 of the Code and the U.S. Treasury and IRS guidance issued thereunder (collectively, the "Foreign Account Tax Compliance Act" or "FATCA") require a Fund to obtain information sufficient to identify the status of each of its shareholders. If a shareholder fails to provide this information or otherwise fails to comply with FATCA, a Fund may be required to withhold under FATCA at a rate of 30% with respect to that shareholder on Fund dividends and distributions and on the proceeds of the sale, redemption, or exchange of Fund shares. A Fund may disclose the information that it receives from (or concerning) its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA, related intergovernmental agreements or other applicable law or regulation. Each investor is urged to consult its tax advisor regarding the applicability of FATCA and any other reporting requirements with respect to the investor's own situation, including investments through an intermediary.

Foreign Bank and Financial Accounts and Foreign Financial Assets Reporting Requirements. A shareholder that owns directly or indirectly more than 50% by vote or value of a Fund, is urged and advised to consult its own tax advisor regarding its filing obligations with respect to FinCen Form 114, Report of Foreign Bank and Financial Accounts.

Tax-Exempt Shareholders. A tax-exempt shareholder could realize unrelated business taxable income ("UBTI") by virtue of its investment in a Fund if shares in the Fund constitute debt financed property in the hands of the tax-exempt shareholder within the meaning of Code Section 514(b).

It is possible that a tax-exempt shareholder of a Fund will also recognize UBTI if such Fund recognizes "excess inclusion income" (as described above) derived from direct or indirect investments in REMIC residual interests or TMPs. Furthermore, any investment in a residual interest of a CMO that has elected to be treated as a REMIC can create complex tax consequences, especially if a Fund has state or local governments or other tax-exempt organizations as shareholders.

In addition, special tax consequences apply to charitable remainder trusts ("CRTs") that invest in RICs that invest directly or indirectly in residual interests in REMICs or in TMPs.

Tax Shelter Reporting Regulations. Under U.S. Treasury regulations, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders are urged and advised to consult their own tax advisors to determine the applicability of these regulations considering their individual circumstances.

Shareholders are urged and advised to consult their own tax advisor with respect to the tax consequences of an investment in a Fund including, but not limited to, the applicability of state, local, foreign, and other tax laws affecting the particular shareholder and to possible effects of changes in federal or other tax laws.

FINANCIAL STATEMENTS

The Fund's audited financial statements for the fiscal year ended February 28, 2023, including the Financial Highlights appearing in the Prospectus, are incorporated by reference and made a part hereof. You may request a copy of the Fund's Annual and Semi-Annual Reports to shareholders at no charge by calling the Fund at (877) 244-6235 or by visiting the Fund's website at www.stringeramfunds.com.

APPENDIX A – PROXY VOTING POLICIES

The following proxy voting policies are provided:

- (1) the Trust’s Proxy Voting and Disclosure Policy and
- (2) the Adviser’s Proxy Voting and Disclosure Policy.

(1) PROXY VOTING AND DISCLOSURE POLICY FOR 360 FUNDS

I. Introduction

Effective April 14, 2003, the SEC adopted rule and form amendments under the Securities Act of 1933, the Securities Act of 1934, and the Investment Company Act of 1940 (“Investment Company Act”) to require registered management investment companies to provide disclosure about how they vote proxies for their portfolio securities (collectively, the rule and form amendments are referred to herein as the “IC Amendments”).

The IC Amendments require that the Trust and each Fund disclose the policies and procedures used to determine how to vote proxies for portfolio securities. The IC Amendments also require each Fund to file with the SEC and to make available to their shareholders the specific proxy votes cast for portfolio securities.

This Proxy Voting and Disclosure Policy (“Policy”) is designed to ensure that each Fund complies with the requirements of the IC Amendments, and otherwise fulfills its obligations with respect to proxy voting, disclosure, and recordkeeping. The overall goal is to ensure that each Fund’s proxy voting is managed in an effort to act in the best interests of its shareholders. While decisions about how to vote must be determined on a case-by-case basis, proxy voting decisions will be made considering these guidelines and following the procedures recited herein.

II. Specific Proxy Voting Policies and Procedures

A. General

The Trust’s Board of Trustees (“Board”) believes that the voting of proxies is an important part of portfolio management as it represents an opportunity for shareholders to make their voices heard and to influence the direction of a company. The Trust and each Fund are committed to voting corporate proxies in the manner that best serves the interests of each Fund’s shareholders.

B. Delegation to Fund’s Adviser

The Board believes that the Adviser, as each Fund’s investment adviser, is in the best position to make individual voting decisions for each Fund consistent with this Policy. Therefore, subject to the oversight of the Board, the Adviser is hereby delegated the following duties:

- (1) to make the proxy voting decisions for each Fund; and
- (2) to assist each Fund in disclosing each Fund’s proxy voting record as required by Rule 30b1-4 under the Investment Company Act, including providing the following information for each matter with respect to which each Fund was entitled to vote: (a) information identifying the matter voted on; (b) whether the matter was proposed by the issuer or by a security holder; (c) whether and how each Fund cast its vote; and (d) whether each Fund cast its vote for or against management.

The Board, including a majority of the independent trustees of the Board, shall approve the Adviser's Proxy Voting and Disclosure Policy ("Adviser's Voting Policy") as it relates to each Fund. The Board shall also approve any material changes to the Adviser's Voting Policy no later than four (4) months after adoption by Adviser.

C. Conflicts

In cases where a matter with respect to which each Fund is entitled to vote presents a conflict between the interest of each Fund's shareholders, on the one hand, and those of each Fund's investment adviser, principal underwriter, or an affiliated person of each Fund, its investment adviser or principal underwriter, on the other hand, each Fund shall always vote in the best interest of each Fund's shareholders. For purposes of this Policy a vote shall be considered in the best interest of each Fund's shareholders (i) when a vote is cast consistent with a specific voting policy as set forth in the Adviser's Voting Policy, provided such specific voting policy was approved by the Board or (ii) when a vote is cast consistent with the decision of the Trust's Proxy Voting Committee (as defined below).

III. Fund Disclosure

A. Disclosure of Fund Policies and Procedures With Respect to Voting Proxies Relating to Portfolio Securities

Each Fund shall disclose this Policy, or a description of the policies and procedures of this Policy, to its shareholders in its Statement of Additional Information ("SAI") on Form N-1A. Each Fund will notify shareholders in the SAI and each Fund's shareholder reports that a description of this Policy is available upon request, without charge, by calling a specified toll-free telephone number, by reviewing each Fund's website, if applicable, and by reviewing filings available on the SEC's website at <http://www.sec.gov>. Each Fund will send this description of each Fund's Policy within three business days of receipt of any shareholder request, by first-class mail or other means designed to ensure equally prompt delivery.

B. Disclosure of each Fund's Complete Proxy Voting Record

In accordance with Rule 30b1-4 of the Investment Company Act, each Fund shall disclose to its shareholders on Form N-PX each Fund's complete proxy voting record for the twelve-month period ended June 30 by no later than August 31 of each year.

Each Fund shall disclose the following information on Form N-PX for each matter relating to a portfolio security considered at any shareholder meeting held during the period covered by the report and with respect to which to each Fund was entitled to vote:

- (i) The name of the issuer of the portfolio security;
- (ii) The exchange ticker symbol of the portfolio security (if available through reasonably practicable means);
- (iii) The Council on Uniform Security Identification Procedures ("CUSIP") number for the portfolio security (if available through reasonably practicable means);
- (iv) The shareholder meeting date;
- (v) A brief identification of the matter voted on;
- (vi) Whether the matter was proposed by the issuer or by a security holder
- (vii) Whether each Fund cast its vote on the matter;
- (viii) How each Fund cast its vote (e.g., for or against proposal, or abstain; for or withhold regarding

- election of directors); and
- (ix) Whether each Fund cast its vote for or against management.

Each Fund shall make its proxy voting record available to shareholders either upon request or by making available an electronic version on or through each Fund's website, if applicable. If each Fund discloses its proxy voting record on or through its website, each Fund shall post the information disclosed in each Fund's most recently filed report on Form N-PX on the website beginning the same day it files such information with the SEC.

Each Fund shall also include in its annual reports, semi-annual reports and SAI a statement that information regarding how each Fund voted proxies relating to portfolio securities during the most recent twelve-month period ended June 30 is available (1) without charge upon request, by calling a specified toll-free (or collect) telephone number, or (if applicable) on or through each Fund's website at a specified Internet address; and (2) on the SEC's website. If each Fund discloses that its proxy voting record is available by calling a toll-free (or collect) telephone number, it shall send the information disclosed in each Fund's most recently filed report on Form N-PX within three business days of receipt of a request for this information, by first-class mail or other means designed to ensure equally prompt delivery.

IV. Recordkeeping

The Trust shall keep the following records for a period of at least five years, the first two in an easily accessible place:

- (i) A copy of this Policy;
- (ii) Proxy Statements received regarding each Fund's securities;
- (iii) Records of votes cast on behalf of each Fund; and
- (iv) A record of each shareholder request for proxy voting information and each Fund's response, including the date of the request, the name of the shareholder, and the date of the response.

The foregoing records may be kept as part of the Adviser's records.

Each Fund may rely on proxy statements filed on the SEC EDGAR system instead of keeping its own copies, and may rely on proxy statements and records of proxy votes cast by the Adviser that are maintained with a third party such as a proxy voting service, provided that an undertaking is obtained from the third party to provide a copy of the documents promptly upon request.

V. Proxy Voting Committee

A. General

The Proxy Voting Committee of the Trust shall be composed entirely of independent trustees of the Board and may be comprised of one or more such independent trustees as the Board may, from time to time, decide. The purpose of the Proxy Voting Committee shall be to determine how each Fund should cast its vote, if called upon by the Board or the Adviser, when a matter with respect to which each Fund is entitled to vote presents a conflict between the interest of each Fund's shareholders, on the one hand, and those of each Fund's investment adviser, principal underwriter, or an affiliated person of each Fund, its investment adviser or principal underwriter, on the other hand.

B. Powers and Methods of Operation

The Proxy Voting Committee shall have all the powers necessary to fulfill its purpose as set forth above and such other powers and perform such other duties as the Board may, from time to time, grant and/or assign the Proxy Voting Committee. The Proxy Voting Committee shall meet at such times and places as the Proxy Voting Committee or the Board may, from time to time, determine. The act of a majority of the members of the Proxy Voting Committee in person, by telephone conference or by consent in writing without a meeting shall be the act of the Proxy Voting Committee. The Proxy Voting Committee shall have the authority to utilize Trust counsel at the expense of the Trust if necessary. The Proxy Voting Committee shall prepare minutes of each meeting and keep such minutes with the Trust's records. The Proxy Voting Committee shall review this Policy and recommend any changes to the Board as it deems necessary or advisable.

VI. Other

This Policy may be amended, from time to time; provided, however, that material changes are approved by the Board as provided under Section II(B) above.

(2) PROXY VOTING AND DISCLOSURE POLICY OF THE ADVISER

Stringer Asset Management ("SAM") has been delegated by many clients the authority to vote all proxies relating to securities held within the accounts managed by the Firm. In accordance with Rule 206(4)-6, the Firm has adopted and implemented written policies and procedures that are reasonably designed to ensure that SAM votes client securities in the best interest of clients and strives to keep all votes free from any inappropriate influences or material conflicts. The Firm exercises voting responsibilities in a method that we believe is most likely to increase the value of the securities within the portfolio.

The Firm utilizes a third party proxy voting service, which includes electronic voting services and research. SAM conducts its own proxy research by reading the proxies and proposals for each security while using third party research as a guide.

Unless specified otherwise by the client, SAM will vote all proxies according to the Firm's internal voting policies. If a client wishes to have the Firm vote proxies based on other specific proxy voting guidelines, the client must request this in writing.

Proxy Voting Procedures

- Research Analysts are responsible for monitoring proxy votes and ensuring that (i) proxies are received and forwarded to the appropriate decision makers; and (ii) proxies are voted in a timely manner upon receipt of voting instructions. SAM is not responsible for voting proxies it does not receive but will make reasonable efforts to obtain missing proxies.
- Proxy voting decisions will be determined by a Research Analyst for each account. Issues not covered by these guidelines or any deviations from these guidelines must be discussed with and reviewed by one of the Portfolio Managers.
- Research Analysts may determine not to vote a particular proxy, if the costs and burdens exceed the benefits of voting.

APPENDIX B – NOMINATING AND CORPORATE GOVERNANCE COMMITTEE CHARTER

Nominating and Corporate Governance Committee Charter

360 Funds

Nominating and Corporate Governance Committee Membership

1. The Nominating and Corporate Governance Committee of 360 Funds (the “Trust”) shall be composed entirely of Independent Trustees.

Board Nominations and Functions

1. The Committee shall make nominations for Trustee membership on the Board of Trustees, including the Independent Trustees. The Committee shall evaluate candidates’ qualifications for Board membership and their independence from the investment advisers to the Trust’s series portfolios and the Trust’s other principal service providers. Persons selected as Independent Trustees must not be “interested person” as that term is defined in the Investment Company Act of 1940, nor shall Independent Trustee have any affiliations or associations that shall preclude them from voting as an Independent Trustee on matters involving approvals and continuations of Rule 12b-1 Plans, Investment Advisory Agreements and such other standards as the Committee shall deem appropriate. The Committee shall also consider the effect of any relationships beyond those delineated in the 1940 Act that might impair independence, *e.g.*, business, financial or family relationships with managers or service providers. See Appendix A for Procedures with Respect to Nominees to the Board.
2. The Committee shall periodically review Board governance procedures and shall recommend any appropriate changes to the full Board of Trustees.
3. The Committee shall periodically review the composition of the Board of Trustees to determine whether it may be appropriate to add individuals with different backgrounds or skill sets from those already on the Board.
4. The Committee shall periodically review trustee compensation and shall recommend any appropriate changes to the Independent Trustees as a group.

Committee Nominations and Functions

1. The Committee shall make nominations for membership on all committees and shall review committee assignments at least annually.
2. The Committee shall review, as necessary, the responsibilities of any committees of the Board, whether there is a continuing need for each committee, whether there is a need for additional committees of the Board, and whether committees should be combined or reorganized. The Committee shall make recommendations for any such action to the full Board.

Other Powers and Responsibilities

1. The Committee shall have the resources and authority appropriate to discharge its responsibilities, including authority to retain special counsel and other experts or consultants at the expense of the Trust.
2. The Committee shall review this Charter at least annually and recommend any changes to the full Board of Trustees.

Adopted: October 25, 2017

**APPENDIX A TO THE NOMINATING AND CORPORATE GOVERNANCE
COMMITTEE CHARTER**

360 FUNDS

PROCEDURES WITH RESPECT TO NOMINEES TO THE BOARD

- I. *Identification of Candidates.* When a vacancy on the Board of Trustees exists or is anticipated, and such vacancy is to be filled by an Independent Trustee, the Nominating and Corporate Governance Committee shall identify candidates by obtaining referrals from such sources as it may deem appropriate, which may include current Trustees, management of the Trust, counsel and other advisors to the Trustees, and shareholders of the Trust who submit recommendations in accordance with these procedures. In no event shall the Nominating and Corporate Governance Committee consider as a candidate to fill any such vacancy an individual recommended by any investment adviser of any series portfolio of the Trust, unless the Nominating and Corporate Governance Committee has invited management to make such a recommendation.
- II. *Shareholder Candidates.* The Nominating and Corporate Governance Committee shall, when identifying candidates for the position of Independent Trustee, consider any such candidate recommended by a shareholder if such recommendation contains: (i) sufficient background information concerning the candidate, including evidence the candidate is willing to serve as an Independent Trustee if selected for the position; and (ii) is received in a sufficiently timely manner as determined by the Nominating and Corporate Governance Committee in its discretion. Shareholders shall be directed to address any such recommendations in writing to the attention of the Nominating and Corporate Governance Committee, c/o the Secretary of the Trust. The Secretary shall retain copies of any shareholder recommendations which meet the foregoing requirements for a period of not more than 12 months following receipt. The Secretary shall have no obligation to acknowledge receipt of any shareholder recommendations.
- III. *Evaluation of Candidates.* In evaluating a candidate for a position on the Board of Trustees, including any candidate recommended by shareholders of the Trust, the Nominating and Corporate Governance Committee shall consider the following: (i) the candidate's knowledge in matters relating to the mutual fund industry; (ii) any experience possessed by the candidate as a director or senior officer of public companies; (iii) the candidate's educational background; (iv) the candidate's reputation for high ethical standards and professional integrity; (v) any specific financial, technical or other expertise possessed by the candidate, and the extent to which such expertise would complement the Board's existing mix of skills, core competencies and qualifications; (vi) the candidate's perceived ability to contribute to the ongoing functions of the Board, including the candidate's ability and commitment to attend meetings regularly and work collaboratively with other members of the Board; (vii) the candidate's ability to qualify as an Independent Trustee and any other actual or potential conflicts of interest involving the candidate and the Trust; and (viii) such other factors as the Nominating and Corporate Governance Committee determines to be relevant in light of the existing composition of the Board and any anticipated vacancies. Prior to making a final recommendation to the Board, the Nominating and Corporate Governance Committee shall conduct personal interviews with those candidates it concludes are the most qualified candidates.
